AUTOGIRO TESTS SHOW RELIABLE LANDING POWER

Reduction of Blades From Four to Three Being Tried Out to Save Weight

NO SKILL NECESSARY IN HANDLING MACHINE

Velocity of Vertical Drop Gives High Speed to Mechanism That Impedes Descent

Special from Monitor Bureau LONDON-The British company which has been formed for the purpose of developing Señor de la Cierva's autogiro, or rotating "windearly experiment a variation with CHICAGO SIFTS three instead of four blades to the rotating wing. The objects are two-FINANCIAL 'ADS fold: in the first place a certain amount of blade interference in the four-bladed type, through one blade following so quickly in the wake of another will be avoided, and in the second place weight will be saved. As compared with the first autogiro machines the new types are much lighter, and as compared with ordinary airplanes of the same power there is a great saving of structure

It is objected by some hasty critics that in the performance in speed, altitude, and climb of the autogiro there is a serious deficiency as commatter of fact, accurate measurement of performance has not yet cial instruments will be needed, and these are being contrived.

A Favorable Opinion H. E. Wimperis, director of scien-

assured the writer the other day he restors who complained to the buis firmly convinced that the autogiro reau that they had been defrauded is capable of highly important developments, and before the British imately \$3,500,000 during the same period. Of more than 50 local offices "strongly believed to be buckparent limitations.

ing vehicle, although still subject to practically all are out of business, the condition that to obtain support in the air it must maintain considerable forward velocity. The autogico of the board of directors by Mor-

present to be sure that this is the for its services. case, and meanwhile the wise will prefer to suspend judgment. Against such deficiencies, if they exist, could rarer, that big costly airdrom safety in the case of the ordinary sirplane in most circumstances, is necessary to what has been d a "land-anywhere machine." Added to that, there is the assurance build than the ordinary airplane,

Rotation of Wings Insured The simplest explanation of the effect of the autogiro is that when the body of the machine has ceased to move forward there are still acting on the wings which keep them rotating at very high ing at more than the speed of a

\$40,000,000 Traffic Relief Plan Laid Before Providence Council WINS PLAUDITS

Construction of Four Great Cross-Town Boulevards, Each 140 Feet Wide, the Widening of 25 Streets and Many Underpasses, Are Involved in Project

ture of \$40,000,000 for the relief of traffic congestion in the city of Providence and calling for the con-struction of four 140-foot boulevard highways across the city, the widen-ing of more than 25 streets and the elimination of several grade street crossings by underpasses were laid before the City Council here yester-day by Robert Whitten of New York,

city planning consultant.

In addition to providing additional street capacity, the plan proposes to create thoroughfares upon which a speed of 30 miles an hour will be as safe as 15 miles an hour is on the ordinary city street today. It is also designed to carry through travel around the congested down-town district instead of through streets al-

eady crowded.
These thoroughfares, it is believed, would be adequate to provide for normal growth of traffic for 25 years, while the construction work, according to Mr. Whitten's plan, would be completed in 12 years

Financing of Plan Mr. Whitten suggests that \$24,000,raised by the issuance of 30-year through Allen's Avenue, Eddy Street, ssments on property abutting on width of 90 feet. the improved highways. Mr. Whitten

include in their 140 feet of width a central express road and two outer whiten said, but subways, if needed service roads all separated by narrow parkings. The central road as cheaply as now.

PROVIDENCE, R. I., Oct. 12 (Spe-would consist of two one-way lanes cial)—Plans involving an expendicate of feet wide and capable of being widened later to 30 feet, Thus the boulevards would have the capa-

> streets. One great cross-town road, 140 feet in width, would stretch from Park clear across the city to the North

> Providence line.
>

POLICE PARADE OF SPECTATORS

500 Members of Force in Line - Governor and Mayor Pay Tribute

Boston officially observed Columbus Day today with a parade in the morning of about 1500 members of in the afternoon on Boston Common cises appropriate to the occasion.

Reviewed by Governor Fuller,
members of the Executive Council and various state officials at the State House; by Mayor Nichels, members of the City Council and city officials, the police parade, divided into three battalions, marched through the streets of downtown Boston starting from Commonwealth Avenue at the Public Garden.
The decorations in the streets

through which the policemen paraded were mainly United States flags set in standards along the sidewalks.
The different divisions, station forces, rifle and machine gun units, were applicated as the men in their mankind full dress blue for winter stepped briskly forward.

Parades also were held in the North End by local Italian organizations both morning and afternoon. A large crowd surrounded bandstand in the Common this afternoon at the municipal exercises, over which Eliot Wadsworth was the pre-siding officer. The Alhambra Band furnished the musical selections for the occasion.

Mayor Makes Address

"The strength of a people can best be measured by devotion to its ideals," said Mayor Nichols, speaking rom the grandstand. "When ideals fall the nation crumbles. But when people holds fast to its ideals and continues its devotion to its heroes walks surely to a leadership among

Granite Railway Memorials Mark Peace Achievements UNITES TO BACK

Future Monuments Will Be for Progress, Not War, Says Dr. Frothingham at Centenary

MILTON, Mass., Oct. 12 (Special)

—Commemorating the centennial of the famous Granite Railway—the first built in the United States—the Rev. Dr. Paul Revere Frothingham, president of the Bunker Hill Monument Association, declared that monuthe famous Granite Railway—the first built in the United States—the Rev. Dr. Paul Revere Frothingham, president of the Bunker Hill Monument Association, declared that monu-ments of the future will be built more to mark the achievements of

peace than the deeds of war.

Speaking at the unveiling of the tablet which is to stand as an enduring tribute to America's pioneer railroad enterprise. Dr. Frothing-ham told the hundreds of persons gathered in East Milton Square to celebrate this occasion that the tremendous accomplishments in transportation have paved the way for a closer union of nations.

"We have bridged chasms, builded tunnels through mountains and connected remote parts of the world, but from now on the work of man kind will assume another character,"

"The great task of the future of mankind will be in bridging the chasms of individuality, communities and nations. Civilization will beintercommunication, friendship and good will.

"The world will have no more need for monuments like Bunker Hill, for the peoples will live together in unity, co-operation and peace. The brotherhood of the different races of the globe has become so cemented as to never again be torn asunder.

Monuments to Friendship "Great monuments will rise to commemorate the kinship among nations and everlasting peace." And here Dr. Frothingham paused in his prophecy of world peace to tell of the origin of the name Bunker Hill. that people grows and flourishes and Over in London, it seems, in a district called Hempstead is "Bunker's Hill," where only a few years ago the British erected a monument nar rating the battle during the Revolution showing that all enmity has

passed between the two countries. "The courage, patriotism and chiv lish American independence was worth being celebrated by the erec tion of a shaft even in England," concluded Dr. Frothingham.

Governor Fuller, who was scheduled to appear at seven Columbus as did the world in the fifteenth cen-tury. We need men of extraordinary initiative, men who will devote their he cherished the hope that out of the on the program, and he declared that lives to the common welfare. We celebration in East Milton will come need men who will investigate the a respect for tradition that has made causes of misunderstanding between the United States "the greatest na-

AMERICAN LABOR DIRECT PRIMARY

Detroit Convention Takes Strong Stand Against Old Nominating System

PORTO RICAN LABOR IMPORTS SUSPENDED

Agreement Is Reached With Island Group-Civil Administration Is Asked

DETROIT, Mich., Oct. 12 (Special) Reaffirmation of belief in the direct primary system as a distinct improvement on the old convention plan of selecting candidates for public office was expressed by the American Federation of Labor in a resolution unanimously adopted at

Attempts to destroy the direct system in a number of states as well as to defeat its purpose through the expenditure of large sums of money were characterized by delegates as attacks on popular and democratic government. Further discussion of this issue in all international, State and local labor conventions was urged. At the same time the apathy of workers in failing at regular elections was strongly

While some mention was made of a third political party to be sponsored by organized labor, this proposal was not received with any enthusiasm by the convention, although the need for concerted political action along regular lines was stressed by spokesmen of representative trade unions.

Opposition to Warlike Teaching Although opposition to the glorification of war and to the promotion of teachings which incite international conflicts was expressed, several resolutions denouncing citizens' military training camps were disapproved. The opportunities for recreation and outdoor sports afforded

by these camps were commended.

A plea for the complete unionization of the textile industry under the auspices of the federation was voiced by Dr. Stephen S. Wise, Rabbi of the Free Synagogue, New York City, who declared that the situation in the Passaic textile strike pre-sented such a challenge to organized

Dr. Wise stated that this intensive organization was demanded in the textile industry, which "the Government subsidized by imposing a high protective tariff, while at the same time textile workers are shamefully underpaid." He said that the Passaic was received at the office of the Governor today. The farmers, through their spokesman, promised to bring their cattle.

The suggested that the Governor today is a suggested that the Governor today. The farmers, through their spokesman, promised to bring and to obtain a living wage and denounced the policy of the mill

DETROIT, Oct. 12 (A)-Officers of the American Federation of Labor tions will be placed upon the migration of Porto Rican workers to the cotton regions of the Pacific South-west and have abandoned a tenta-tive program to bring the matter be-fore the organization's convention,

in session here.
Conversations between representatives of the Pan-American Federation of Labor and members of the executive council of the Ameri-can Federation have resulted in an understanding on the basis of ef-fective limitation upon the movement of non-employed from Porto Rico to the United States to enter into competition with the higher paid Amer-

ican workers. Resolutions on Porto Rico The convention approved two resolutions touching upon Porto Rico. government under the Department of the Interior, to replace the present administration under the War De-

sideration of the report of its committee on resolutions, with recommendations on relations with Russia, the problem of labor organizations under employer control, judicial in-junctions in labor disputes and the relief for the striking textile workers of Passaic, N. J., in the first

order of business. The convention reaffirmed its nonpartisan political policy in approv-ing the report of the resolutions committee recommending withhold-ing action on a resolution indorsing Alfred E. Smith, Governor of New York, for the Democratic presiden-

tial nomination in 1928.

Immigration Law Upheld Two resolutions urging modifica-tion of the United States immigration laws to permit admission of aliens seeking refuge from 'political or religious persecution" were rejected by the convention after heated

In accepting the report of its committee on resolutions, the convention expressed approval of the action of the federation's officers in resisting recent moves to increase immigra-

tion quotas. Supporters of the committee re-port expressed sympathy with the "oppressed and persecuted of all nations," but added that their problems could not be solved by a re-laxation of the United States immi-

gration restrictions. After approving two resolutions pledging financial support of the striking textile workers of Passaic, N. J., the delegates contributed \$800 to a relief fund and pledged more than \$3000 for future payment,

Boston's Police on Parade

Financiers Meeting in Quebec Discuss Question of **Authentic Information**

QUEBEC, Oct. 12 (Special)-The creation of a clearing house to provide first-rate information concern ing foreign securities, to inquire into the recently developed practice of forming holding companies to conreal estate bonds and the adoption of a federal blue sky law in place of the legislation adopted by of the legislation adopted by indi-vidual states, were among the propositions recommended by committees of the Investment Bankers' Association of America meeting here yes-

It was said that the competition of both domestic and foreign securities offering in the American markets was now so keen that only the higher grade securities had much opportunity of finding purchases. At same time, the enormous expansion of America's foreign creasing disposition of other counfor loans made the organization of a operation of investment bankers as decisive rôle in the battle of Sanfor the protection of investors.

Financing of Small Companies

The organization of holding companies especially in the public utility field has proceeded rapidly

committee on real estate ries of securities had raised problems that require closer consideration. One practice complained of was that overvaluing the land, adding "good will" in the shape of potential worth with improvements completed and the neighborhood built up. This was often the margin between a good and bad loan.

Unsatisfactory Practice Another practice not considered satisfactory was that of the originat-ing house controlling the market of When the Spanish War broke out ing house controlling the market of its issue, buying and selling at its own price. But it was thought competition would at once correct abuses which might spring from this prac-

A matter brought up by Canadian A matter brought up by Canadian delegates was the tendency of various provincial governments in the west to adopt legislation establishing lines that take precedence of mortgages. Thus hall insurance can be placed by the owner of a mortgaged property and the insurance premium is collected as a tax, and has prority even over a first morthas priority even over a first mort-gage contracted before the Hail Insurance Act was adopted. Certain loans made under government rural credits also have priority over mort-

LORD PLUMER PAYS

By Special Cable

JERUSALEM, Oct. 12-The highest honor paid to an official visitor in recent years was witnessed yesterday when Lord Plumer, High Com-missioner of Palestine, wearing a field marshal's uniform personally welcomed Feisul, King of Irak, at the station. The King is returning from London to Bagdad via Amman, whence he will fly across the Syrian

King Feisul crossed the Mediterranean with Henry Ponsot, the new French commissioner of Syria, causing an unconfirmed rumor that the Frenchman had asked the Arab monarch to see Atrash, the Druse chief and advise him to abandon his struggle against France. M. Ponsot is due to arrive at Beirut today.

Secretary Wilbur Speaks at Geneva Delegates Remove Obstacles to Discussion on Main Issues

WAY CLEAR FOR

By Special Cable GENEVA, Oct. 12-The plenary ubcommittee of the preparatory commission of the disarmament League of Nations will begin,

Wednesday next, the second reading of the replies which it has drawn to the seven questions submitted to it concerning methods of disarmament The American delegation has gained the point that there should be no more minority or majority reports, and that equal weight in the final report for the preparatory commission should be given to each com-

The ground is clear for an unfettered debate on the main issues which still divide opinion. These are thanks to the support of the European Latin bloc and the majority rule which formerly prevailed, were able to carry the day against the Anglo-Saxon, Scandinavian and Teutonic viewpoints.

Control of Armaments

The first point is that of inis a division of opinion as regard but the welfare and success of his the comparative value of material

trol of armaments, against which of James Dayton and Mary Sexton the Americans so strongly ob-Then there is a conflict of ideas concerning gross tonnage and ton-

Another point is that of the con-

nage by categories as standards of comparison applicable to naval disarmament. Another point is a controversy about the

leclare impracticable. Lastly, there is the question of ton.

regional disarmament, during the discussion of which last week the French put forward such strong conditions regarding security that what may be roughly called the Anglo-Saxon group was driven into the op-

Gulf Less Wide

There are apparently almost fundamental differences on some of these important questions. Never-theless, the gulf between the opposing views is less wide than it was and the new method of presenting a report, by which each country is permitted its say, will give the plenary sub-committee a good chance of presenting a united report to the preparatory commission. At all events, it will be possible to emphasize in a general summary the points of agreement, which is a most important consideration for finally bringing divisions of opinion into consideration for finally ARMS DEBATE

Thus it is hoped the preparatory disarmament commission may, after discussing this report, be able to draw up a reasoned statement on the viewpoints of all delegations in such a way as to afford a founda-tion for a practical scheme for the limitation of armaments. But for the assistance of the American delegates, who frequently brought a detached view to discussions in which other experts became completely entanhardly have been carried on.

ARCHITECTS OPEN REGIONAL MEETING

Professional Problems Discussed at Providence

PROVIDENCE, R. I., Oct. 12 (AP)lembers of the executive committee of the American Institute of Archiects opened a regional convention here today for the discussion of pro problems. Among fessional attending are: Milton B. Medary Jr roughly six, on which the French, national president; Frank C. Bald win, secretary; William Emerson first vice-president; C. H. Hammond second vice-president, and J. Monroe

Hewlett of the board of directors. A New England regional conven tion will be conducted tomorrow. when delegations from the Boston and Connecticut chapters will attend. MANUFACTURERS PREPARE WAY FOR AN ECONOMIC CONFERENCE

British and German Representatives Discuss Trade Problems at Meeting at Romsey

LONDON, Oct. 11—The meeting of end the competitive and disruptive menian alphabet was founded and a system on which trade between Eu-British and German manufacturers system on which trade between Eu and financiers, which has now conshire, is regarded here hopefully, as preparing the way for the muchneeded international economic con-ference. The only criticism so far heard is in Liberal-Labor Opposition circles, where the argument is used that such discussions may tend to restrict competition in supply, and

thus raise prices. The proceedings at the meeting have not been as private as reported. They are understood to have included such questions as that of breaking down the tariff walls which now prevent a interchange of trade in Europe, also the re-moval of difficulties connected with depreciated exchanges and burdensome war debts.

Observer, in a well-informed article, says that what has taken "expert preparation for the European economic Locarno, about which so much was heard last spring.

The newspaper adds: "The broad spring."

Archag Tchobanian, Winner of French Honors, Plans Lecture Tour

Archag Tchobanian, Armenian pa triot and a leading Armenian poet, is passing a few days in Boston previous to a lecture tour of several months throughout the United States on "The Culture and Art of Armenia." Through the translation of a number of his poems by Alice Stone Blackwell of this city, he has a circle of literary admirers awaiting him

Some of his works in French have had introductions by Clemenceau, Anatole France, Paul Adam, Denys Cachin, Emile Verhaeren, and others of prominence. His volume on Ar menian popular poetry won the prize of the French Academy. He is a member of the Société des Gens de Lettres. Mr. Tchobanian wears the red ribbon of the Legion of Honor conferred upon him by the French Government for his contributions to

French culture. A native of Constantinople, he has lived in Paris since 1895, devoting himself to protecting and advancing the interests of the Armenian people In part, he has worked to bring th aspirations and ideals of his people to the attention of the world through their ancient art and literature,

POINCARE TOURS TWO PROVINCES

Journeys Through Alsaceto Ascertain This makes possible the opening of six or seven streets now blocked," said E. S. Taylor, manager of the Chicago Plan Commission. "This we Hopeful Statement as to Nature of Grievances

By SISLEY HUDDLESTON By Special Cable

PARIS, Oct. 12-Raymond Poincaré is making a tour throughout Alsace-Lorraine, studying problems of a grave character which have been developing, especially during terminal." the past two years. Although the Premier travels incognito, without ceremony of any kind, it is exactly for this reason that importance is

attached to his movements.

Like Haroun-al-Rachid, he goes to vaged. see for himself the conditions of the people and ascertain the precise nature of their grievances. Alsace Lorraine was never truly absorbed into the German Empire. The inhabitants maintained their allegiance to France. Now that the rovinces are recovered by France there is a certain amount of dis affection in some quarters. The Al-satians have been described as the Irish of France.

Home Rule "Agitation"

There is a fairly strong agitation for home rule. Autonomy is de-manded, though the Alsatians are prepared to remain within the framework of France. Lately the propa ganda has been hold and blatant and he last Briand Government was compelled to take repressive measures.
On the whole, M. Poincaré should

vithout severe action, be better able than others to deal with the situation. The motives of the autonomists are mingled, but certainly there is a Roman Catholic influence, for the Roman Catholics feel that France will abolish the system of confes-sional schools and introduce the system of purely secular education which prevails in the rest of France.

There is also the matter of the treatment of religious congregations ouard Herriot came upon this stumblingblock when he endeavored to assimilate Alsace-Lorraine, giving it the same laws as the other provinces. Also pro-German elements undoubtedly are at work Nevertheless, the overwhelming majority of the population are loyal and contented, and the difficulties of administration should not be exagger

Educational Questions

It is understood that M. Poincaré chiefly concerns himself with educational questions. Apparently it is no longer intended to abolish the Roman Catholic: Protestant and Jewish schools. But Alsatians ask greater teaching of the German language in the schools. It is in localities which are largely German that M. Poincaré desires to make a tour of inspection. Orders have been given that complete silence be preserved on the official program. The journalists were not informed of M. Poincaré's

pectedly happened to be the Jewish primary school. The teacher was M. Poincaré quietly to continue his and Friday will witness as an accomclass. There was a time when railroad stations as parking space for the men built their steel highways, put exclusive use of their patrons. up stations and started the wheels turning. The passenger problem took care of itself. People who would travel usually were dependent upon

And it was years after the automobile first appeared as a speck on the horizon of transportation that there was any indication that it would become the most serious competitor of the railroads

Passenger Traffic Loss

Perfection of the gasoline motor high production, prices within the purse-limit of the man on the street improvement in roads, marked the beginning of this revolution in a definite patronage. More attention transportation. Now there is an auto- is being given to the operation of mobile for every six persons in the special trains for conventions and country, and in New England are registered one-fifteenth of the total provide service at reduced rates for number of motorcars in the United There has been a loss of 25 per

cent in railway passenger traffic in so-called "circle tour," in which a the last five years. The Boston & single ticket covers a trip over a Maine Railroad in that period alone lost 15,000,000 passengers. That the New York, New Haven & Hartford and the Boston & Albany Railroads have also suffered is indicated by the act that the number of passengers handled at the great South Station in Boston last year was 2,165,423 less than the year before.

The problem is common to other rail systems throughout the country, differing only in degree. The New York Central, the Pennsylvania and the Reading railroads, all have suf-

fered loss in passenger revenue.

In general, it may be assumed that the automobile has some advantages in the field of short-distance travel which accounts for a great number of the passengers lost by the rail lines in recent years. In long-distance hauls the railroads still have the advantage, although the growing popularity of automobile touring has caused appreciable losses on many

The great problem of the moment, however, is the short-haul passenger, the former commuter who uses his mobile for travel between home and the city, the salesman who covers his territory by automobile,

the shopper and the theatergoer. Rallroads Running Busses

The railroads have entered the field of bus transportation, not only in an effort to regain some of the lost passengers, but as a measure of

As auxiliary service to the steam lines, the railroads' busses have made improvements in steam service possible through fewer train stops and faster schedules. It has been possible to replace unprofitable steam service with busses or self-contained gas-electric motor

Busses, however, can be expected to attract only a limited proportion of the lost patronage, for the pri-vately owned automobile now carries a high percentage of those who once

rode on trains. The railroads cannot offer the individual the flexible and unrestricted service of the private motor car, but they have certain highly valuable advantages which the automobile lacks and never can possess. They offer cheaper transportation and comfortable all-weather service. Having purchased a car, the

average owner, particularly the one who knows his income does not provide for such a luxury, cultivates the comforting but false thought that it does not cost much to operate an

Cold figures, however, show that it costs from 8 to 12 cents a mile for motorcar operation, while the railroads offer transportation ranging from less than 1 cent to 3.6 cents a mile, according to distance and

The automobile is the outstanding. of personal transportation. The railroads represent mass transportation. Railroad men think of passenger traffic in the light of large numbers, and in their relations with action, which by the very nature of rail transportation is necessary if the

railroads are to survive. Paradoxically, the automobile which has stolen away millions of railroad passengers, in the end may send thousands back to the trains. The tremendous number of motorcars on the highways is becoming a

most serious problem.

Traffic congestion has robbed motoring of many of its joys. City streets are jammed with cars, and automobile travel, urban and suburban, is slower and more uncerdom venture on the highways on partment the propeller shaft is week-ends or holidays, so crowded boxed in and two wells, provided

Business men are finding that they must allow more time to reach their foot comfort to an unusual degree offices than heretofore; parking restrictions,—witness the recent cam-paign against overtime parking in to suit the individual taste of the Boston,—must become more strin-customer.

ent.

As a result of this steadily in- ceedingly interesting. Behind the

in Massachusetts in January, will BOSTON'S POLLS eliminate some cars, remains to be seen. It is a fact, however, that a great many private cars are operated on the narrowest margin of in-

liability.

Trains never can be operated for the convenience of the individual or for very small groups. Operating costs make such a course prohibi-tive. But travel can be made more attractive; transportation can be interpreted in terms of comfort and convenience in ways never before attempted, and with excellent prospects of regaining old patrons and polls in Boston be kept open on election day, Nov. 2, from 6 a. m. to 8

LITTLE THEATER

Garden Lane Players Will Unite Talent of Retired Actors and Students

The Garden Lane Players, reently organized by men and women connected with the stage with the object of establishing a permanent Little Theater in Boston, are to give an initial production on Oct. 28, 29 and 30 with the performance of "Rollo's Wild Oats," a Clare Kum-mer comedy, in the Little Theater in Byron Street on Beacon Hill.

The players and the studio workhop of dramatic art which is being conducted in connection with the heater, are under the direction of Hugh William Towne, who has had 15 years of stage experience as actor and manager. He organized and directed for five years the Towne Players of Rochester, N. Y., who are still conducting under his name.

On the advisory board are E. E. "The Enemy"

Plymouth Theater-Crosby Gaige resents "The Enemy," a play in four acts by Channing Pollock. Staged by Robert Milton. The cast:

"The Enemy" Channing Pollock has attained to a plane rarely reached in drama, the universal. Within the little space of a stage room he has provided a ref of the world in little. His play brings war upon the stage only by mirroring its various effects on the life of a professor's family in Vienna. inference the audience receives as vivid a sense of the hideousness of it all as is necessary for the author's purpose, with no passing of

the bounds of the province of the theater as a "playhouse." No shallow view of war as the villian of the play enters into "The Enemy." Mr. Pollock sought after and achieved a deeper effect, the effect that Galsworthy compassed in "The Silver Box" and "Justice," the same effect that is at the core of Ibsen. Mr. Pollock's play in per-formance evokes within each specta-Keen Interest in Food Fair

formance evokes within each spectator another performance, for it is a sort of arraignment of every individual's thinking. In the degree that individuals allow arrogance, that individuals allow arrogance, that individuals allow arrogance, that individuals allow arrogance.

Boston Stage Notes jealousy, greed and vanity to color their motives, it implies, they are exercising the same malevolent forces that expand a million fold in the intrigues, plots and treacherie of those who manufacture wars "The Enemy," then, is bate, and its god is a prejudiced nationalism.

As a background for the senseless xcesses of racial hatreds which are depicted in the second and third of the World War, there is peaceful preluding of the first act when the chumming in human amity with the Austrian youth, Carl Behrend, and Carl's friends. Realities to this group, which includes Carl's fancee, Paul, and her father, Professor Arndt, are not troublesome; they are simply vital topics to be disare simply vital topics to be discussed academically. Though there are vague rumors of the international convulsion that is to come, the world seems securely at peace and everybody is happy. Carl has written an anti-war play, "The Enemy," but in theme it conflicts with the glaunning proposer are considered in the music master series of films.

At the Keith-Albee Boston theater the picture is "Take it from Me," a comedy with Reginald Dehny sale the star.

"One Minute to Play," the Red Grange football picture, is being high-running prewar seas of nationalistic pride, and no manager will

Then comes chaos. Belgium is in-vaded. England declares war on Germany. Carl and his friends, ater. Germany. Carl and his friends, frienzied by the bands and hurrahing The sight of blood on his hand turns of the Somerville stock company. them human side up again and they are contrite. In that one-minute scene Mr. Pollock epitomizes the start, the heat and the end of a war. Carl and the others go off to the trenches, leaving their women folk to fight at home battles with fear and famine, waiting agonized months and even years for word from the loved ones in peril, toiling miserably under the exactions of the profiteers, Then the armistice. Carl isn't coming back, but Pauli is at peace. For her child, and Carl's, will never have to be a soldier. He was one o the war's victims at home. It is with a startling outcry, the like of which theater audiences have probably not heard since Medea's rejoicing in the passing of her children, that Mr. Pollock drops the curtain at the end of the third act of "The Enemy." Nothing letter could be said of the fine acting of Florence Rittenhouse

than that she made this superhuman, this universal, outcry against griefs, but rather conveying through Among these former stage folk, all a naturally cheerful and lovable temperament connotations of the girl's sufferings. Russ Whytal gave a stirring per-

Wallace, Miss Virginia Stokes, Miss sor, to whom is entrusted the more Theo Goodrich, Leslie Barclay, concrete wordings of Mr. Pollock's Lawrence Bolton and Miss Nora exposure of the impulses that lie behind war-making. His speech was Mr. Towne states that the plan is clear, impassioned, ringing with to present modern American drama conviction, always lighted by an inpart a burning quality that lasts through to the end of the play, though Carl is seen no more after OPPOSES CLOTURE the second act. And so one might go through the whole of this admiranie cast, not forgetting Frank Sylvester in a vivid small part, the same Sylvester who was the unforgettable Boney in "The Misleading Lady," and Ethel Downie in a tiny scene that she

"The Student Prince"

Majestic Theater-"The Studen rince," an operetta in a prologue and four acts. Music by Sigmund Romberg, book and lyrics by Dorothy Donnelly. The cast:

When one thinks of "The Student Prince," one thinks of the male chous, for that feature of this spectacular operetta stands out beyond all others. This is not saying that there was not in the performance last night some excellent solo singing and good acting. But rather that a large grouping of men in the manner of this chorus is so unusual that it strikes attention and remains

in memory beyond the ordinary.

The singing of this chorus was excellent, and the songs are so well chosen and fitting to the parts of Heidelberg students that one readily obtains from the play the obtains from the play the atmosphere of the German college town. But it is, of course, from the ensemble that is gained that pleasing sense of an entertainment that is long, clean, amusing, and well per-

formed. The character that makes the lish light comedy, at the Tremont;
A. Jolson, inimitable entertainer, in "Big Boy," spectacular musical show, at the Shubert; "Craig's Wife," drams of a woman who married for a house, at the Park.

orchestral numbers, always a feature, this week take on an operatic tinge with the presentation of "Verdi" in the music master series of films.

At the Keith-Albee Boston theater the picture is "Take it from Ma" personages in the sixties underpersonages in the sixties under-standingly and with pleasing dignity. In the Heidelberg scenes Kathie, the Prince's student sweetheart, and Gretchen, the other waiting girl, were well portrayed by Ilse Marvenga and Kay Hawley. Kathie particularly entered into her part with liveliness and, toward the end, a realistic pathos that was delightful.

Of course, no review of this play would be complete without adequate mention of DeWolf Hopper and his companion, Charles Mack, who played the parts of Luts and Hubert, the prince's attendants. Their humon was clean and pleasing and is in a class by itself.

important part of the operetta, and throughout the music was handled satisfactorily under the direction Fred Quintrell.

D'AD YON ON ON

There's Many A Stitch to Fall Home Decorating

WHEN the cold nights begin to burry us home to home's warmth and comfort, a dozen little "fixings" come to our minds. New touches to lend a new homey feeling-perhaps an odd chair re-upholstered, or new draperies, even a slip cover or so. They are the kind of things that satisfy most when made to order. As in the past, the workrooms of The Shepard Stores are prepared to render their characteristically excellent service. These are a few of the things in which they specialize:

Draperies—made to order

An efficient staff of interior decorators is at your service to aid you in the selection and styling of fabrics to suit your particular decorative scheme. A few suggested materials at Shepard valuegiving prices:

50-in. Sunfast Repp, 1.25 to 2.50 yd. Sunfast Diana Cloth, 2.25 yd.

Rayon-and-Cotton Fabrics, 2.00 to 4.50 yd. Hand Blocked English Chintz, ~ 2.00 yd.

Slip Covers—made to order

Slip Covers of colorful cretonne or pretty chintz can magically transform a piece of furniture to a new freshness and guiety of color. The covers are cut directly on your furniture by skilled cutters and then sewed in our workrooms.

A great variety of materials in a whirl of fascinating colors offer delightful possibilities to choose from.

Window Shades—made to order

English glazed shades have reached a deserved popularity. Your new shades can be made of it or of any material which the market affords. All shades are mounted on guaranteed spring rollers and carefully hung.

Furniture—upholstered and rebuilt

The best springs and materials are used in rebuilding furniture and the workmanship is of surpassing excellence while the upholstering is done with a craftsman art to produce a rejuvenated piece of furniture, fit for long years of further service.

Our stock of Imported Tapestries for upholstering purposes has been greatly augmented by new shipments from abroad, purchased specially for this use.

POLICE PARADE WINS PLAUDITS

(Continued on Page 2, Column 1)

Legion, and Veterans of Foreign Wars were carried in the parade.

On Superintendent Crowley's staff were Capts. George W. Patterson and William Livingston of police head-quarters, Lieuts. Charles B. McCloskey and Edward Mullen, Sergt. Thomas S. J. Kavahagh as regimental major, and Edward J. Seibolt, patroiman. Deputy-Supts. Thomas C. Evans, Forrest F. Hall, and Thomas F. Goode commanded the first, second and third battalions respectively, Lieuts. William Allen, George H. Lieuts. William Allen, George H. Guard, and Harry Burns acted as battalion adjutants.

Eight divisions composed the first

battalion. They were from stations in East Dedham Street, Lagrange, Hyde Park, Charlestown, Roxbury Crossing, Dorchester, Mattapan and Dudley Street.
The second battalion was made up

of detachments from the harbor police, the two South Boston stations, a company from Milk Street, Han-over Street, Back Bay, Joy Street

and Jamaica Plain.

The third battalion was led by Captain Hoppe and his traffic squad. Companies from East Boston and West Roxbury with a second traffic squad, were in this last battalion as as the different machine gun units, metor cycles, special marks-men and police patrol cars.

Wakefield Dedicates Shaft to Spanish War Veterans

Dedication of a memorial to Spanish War Veterans, the seventy-fifth anniversary of the founding of Richardson's Light Guards, new Company E of the 182d Infantry, M. N. G., and the annual reunion of the Sixth Regiment of the Veter-ans' Association of the Spanish American War, took place this after-noon in Wakefield.

The chief event of the celebration was a parade, composed of the mar-shal and his staff, a platoon of police, Salem Cadet Band, Headquarters Troop, 110th Cavalry, M. N. G.; Marine Corps Reserve, Wakefield High School battalion, Corporal Charles E. Parker, Camp 39, and several other military organizations, in-cluding the Girl and Boy Scouts.

After the parade exercises were held at the new Spanish War Veterans' Monument, following which the line of march was resumed. An evening parade will be staged on Wakefield Common by Companies E of Wakefield, F of Waltham, G of Woburn, and M of Everett. After this the reunion of the old Sixth Regiwill take place in the Town

Hall.

The annual banquet of the R. L. G. and the Fine Members' Association will be held in the State Armory in the evening. Among those, who will speak are William S. Youngman, State Treasurer, Maj. Gen. Edward L. Logan, Alfred L. Foote and Harris M. Dolbeare, toasimaster. A banquet will be served to all organizations participating in the parade. The chief marshal of the parade will be Capt. Thomas J. Quinn, commander of the Wakefield National Gnard company with Edward E. Gnard company with Edward E. Hickey, president of the Fine Mém-bers' Association as his chief of staff.

Resigns From Corporation

Resignation of James Byrne, New York lawyer and graduate of Har-yard College in 1877, from the Harvard Corporation was announced by the university officials today.

Mr. Byrne was elected to the Harvard Corporation in 1920, to fill the vacancy left by Henry Lee Higginson. He has rendered invaluable service while on the board and his absence will be keenly felt by his colleagues and throughout the university, the Harvard announcement said. He goes to Europe for a vacation at the end of this month.

Mr. Byrne was graduated from the Harvard Law School in 1882. Since 1883 he has practiced law in New York City. He has been a regent of the University of the State of New York, president of the American Bar Association, and has held many other important positions. For his work with the American Red Cross during the war he was made an Officer of the Crown of Italy and a Chevalier of the Legion of Honor of France. Since 1650 the government of Har-

vard and management of its funds have been in the hands of the president, treasurer, and five Fellows of Havard College, which body is known as the Corporation. It is self-perpet-uating and responsible to the board which are elected by the alumni of

MALDEN POST OFFICE TO HAVE NEW BUILDING

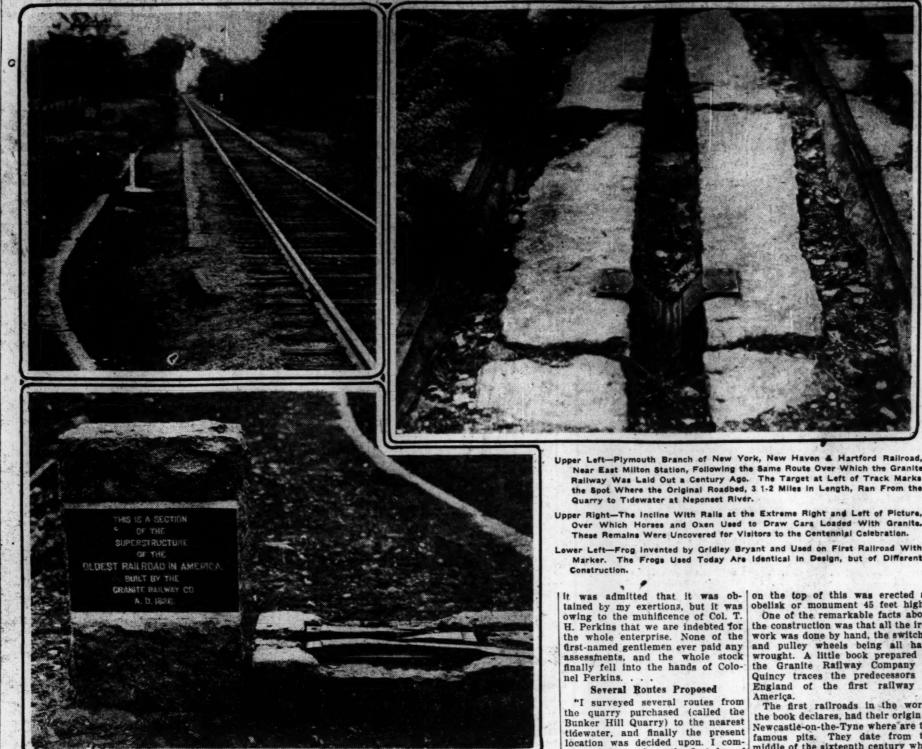

Construction of a new past office building for Malden will begin within a few days, it was announced yea-terday by Roland M. Baker, post-master for the Boston district. The building will be a two-story strucmaster for the Boston district. The building will be a two-story structure of white stone and brick, to be vicinity of Coolidge Corner. located at the corner of Ferry and

Prescott Streets.
The contractors, Coleman Brothers will try to complete the building by Jan. 1, Mr. Baker said. The plans by Jan. 1, Mr. Baker said. The plans were drawn by Desmond & Lord of Boston, following a Doric style of architecture. The new post office will have a frontage of 132 feet on Ferry Street and 102 feet on Prescott Street, with 7000 square feet of space on each floor.

WILL NAME CANDIDATE

Ward committees of the Republica Party in the First Middleser sena-torial district will meet within a few days to choose a candidate for the State Senate who will take the place on the ballot left vacant by the passing of Abbott B. Rice, Senator from Newton. The district includes from Newton. The district includes the towns of Newton, Framingham, Marlborough, Wayland and Weston. Mr. Rice had received the nomination unapposed, and the Democrats of the district put forth no candidate in the primary. Under the law, where a vacancy occurs before the ballots have been printed, the town recommittees may choose a nomine.

Great Tropical Fruit Areas Now Close in Touch by Radio System

Superintendent Howley, at Convention of United Fruit Company, Tells of Establishment of Complete Chain of Stations in Central America

SWAMPSCOTT, Mass., Oct. 12 2 becoming useful citizens of the Special)—The radio as the connecting link between the tropics and the cuban division, said that Cuba is making progress under the wise ad-(Special) -The radio as the connecting link between the tropics and the rest of the world is illuminatingly illustrated by the United Fruit Company, which is holding its first international conference at the New Ocean House.

R. V. Howley, commercial superintendent of the Tropical Radio Company, talking to a Monitor representative, pointed to a chart which showed a graduated line of aerials

"In 1904 we built the first radio station in Central and South America. In the next 10 years we did nothing but pioneer work through the peculiar static of the tropics. In the last five years has come the completed chain of stations that touches every city of importance in the whole

"Today the whole Central American field is in constant and immediate touch with the world, just as Boston or New York or Washington Yesterday Central America got its news, commercial or otherwise, when it was history. Today they are a part of the world and the coffee grower in Guatemala or the fruit producer of Costa Rica is in close touch, through the radio, with the markets of the world. The United ruit Company has put Central America on the man.

Another inestimable service of the radio is the possibility of keeping in close touch with the company's ships. Under the new system every ship reports to Boston every 45 minutes, day and night, giving the position of the ship and condition of the cargo. "We used to load and no one knew about the ship until it came into

port," said Maj. H. L. Harris, outlining this phase of radio usefulness Major Harris also explained the object of the company in bringing together representatives from Cuba, Colombia, Costo Rica, Honduras, Nicaragua, Jamaica, as well as delegates from England, France, Ger-many, Italy, Spain, Norway, Sweden, the book declares, had their origin at Relgium, as an effort to increase un-Newcastle-on-the-Tyne where are the derstanding between these points famous pits. PHONOFILM TO AID STATE REPUBLICANS

Will Picture and Voice the President Speaking

The combined facilities of the talking machine and the moving picture will be used to present President Coolidge before the voters of Massachusetts in speeches during the final weeks of the Republican State campaign for the election of Senator William M. Butler, Governor Fuller and other Republican nominees for State offices. These plans were made public in a demonstration of the talking-motion picture machine at the party's State headquarters here

In this pre-view and pre-hearing of the film-record, the President was seen and heard delivering with characteristic accents and gestures an addr.ss on "Economy." The phonographic part of the machine, known as the DeForest Phonofilm, transmits the voice through a loudspeaker to an audience of any size and syn-chronizes the words with the film.

By this medium President Coolidge will appear many times in various parts of the State. The machine will be mounted on a motor truck and will start on its campaign tour about Oct. 15. Republican leaders feel sure that both the President's address and the novel method of its presentation will attract wide attention.

SEAMAN'S SOCIETY NEARS CENTENARY

\$350,000 Fund Sought for New Building

The Boston Seaman's Friend Soclety will observe its ninety-ninth anniversary with a special program of exercises at the Sailor's Rest, 287 River Tyne.

It was decided that strips of wooden rails be placed where the wagon wheels passed, thus keeping the heavy, iron rims from cutting into the dirt roadways. Since it was found difficult to keep the wagons on continuous and strips of the Boston office outlined the growing propularity of this fruit since its properties have come to be appression. A number of municipal continuous conti

into the dirt roadways. Since it was found difficult to keep the wagons on the planks, side places or flanges were added. The evolution of transportation by railways is self-evident from this time on.

In early America, however, the populace was not easily brought to believe in the practicability of railbelieve in the carriage road was roads. When the carriage road was

cent under the five-year average, the New England crop reporting service here has found.

Improvement was noted principally in Maine and Connecticut. The prospect for the former State was 35,545,000 bushels, or almost 5 per cent more than a month ago, 4 per cent more than a was a month ago, 4 per cent more than a year ago, and 2.2 per cent higher than the five-year average.

Better conditions caused some improvement in Connecticut during September, but the outlook declined slightly in New Hampshire, Vermont, Massachusetts, and Rhode Island.

Little change was seen in the apple situation, with the total volume of commercial fruit for this district not very different from that of last year, although there were substantial differences among the several states.

Maine had a smaller crop than last Maine had a small

TWO MASS MEETINGS HEAR SENATOR BUTLER

William M. Butler (R.), Senator from Massachusetts and Republican candidate for election next month, spoke last night at mass meetings held in the auditorium of the Somerville High School and later in Brattle Hall, Cambridge, Mr. Butler, in each instance, reviewed briefly the achievements of the Republican Party in recent years.

"The Administration of Calvin Coolidge has been vigilant at all times for the rights of the people," he said. "But it has not embarked on any plan to harass legitimate business, and in lifting the burden of taxation and debt it has brought about the greatest prosperity this country has ever known."

MILLS OPERATING 24 HOURS A DAY

Meanwhile New proximately 185 from the 266 Demo

authorities have spent more than \$100,000,000 on improvements of the Delaware River in the last 10 years. During that time, exports through Philadelphia are said to have increased 307 per cent. The program of the Delaware improvements is not yet completed, the dredging of a 25-foot channel to Trenton being advisable to check the list regularly. is not yet completed, the dredging of a 25-foot channel to Trenton being among the projects soon to be undertaken, thus enabling larger type ships to go beyond Philadelphia.

Among the notable betterments made on the river are the numerous municipal piers built by the city of Philadelphia, some of these comparing

Philadelphia, some of these comparing favorably with the Chelsea piers and other new ones in New York City where the largest ocean ships dock. Some of the Philadelphia piers of the newer type are 900 feet long and 336 wide, with a depth of 30 feet of water. These types are for the ships engaged in the intercoastal and foreign trade.

Philadelphia's Advantage Two-story pier-sheds are in place or are planned for the future when traffic warrants them on the piers recently constructed. An advantage of Philadelphia in developing a foreign and coastal trade which is unlike other Atlantic cities is a wide street bordering the entire river front. Delaware Avenue, with two to four railroad tracks along the greater part of it still has room for a dozen lanes of trucks so that water-front con-gestion is unknown in Philadeiphia.

At points, it is 250 feet wide and in other busy stretches is from 50 to 150 feet wide, the road extending along 20 miles of river-front, most of which is devoted to docks, among them the terminals of the Reading. the Pennsylvania and the Baltimore & Ohio rethroads whose tracks reach Ohio railroads, whose tracks reach

the piers at various points along the Delaware. Terminal storage space is also available, the total covered area in the Philadelphia district being 7,500,000 square feet, with 5,500,000 open area.

City's Port Activity Gains While the port of Philadelphia is not widely used, the number of ocean services to and from it include regu-lar sailings to all parts of the world. Most of the leading transatlantic lines maintain freight sailings from Philadelphia as do the intercoastal routes, while coastwise ships ply to all ports on the Atlantic.

Despite the distance up the Delaware River from the ocean, Philadelphia is growing as a port and the channel in the river, 1000 feet wide, is being dredged to a uniform depth of 35 feet, this work being 75 per cent completed. During 1925, a total of 11,000 ships arrived and cleared and the total value of foreign trade, im-

port and export through the port amounted to \$328,000,000. American Merchant Lines

American Merchant Lines
The American Merchant Lines, now
managed for the Shipping Board by
J. H. Winchester & Co., include five
ships which will be sought after in the
hids to be submitted next month for
the Shipping Board's fleet. The ships
named the American Skipper, Farmer,
Banker, Trader and Merchant, are
spiendid ships, of adequate cargo-carrying capacity, capable of fast time
in crossing the Atlantic and having
accommodations for 100 passengers
also.

While the passenger quarters are not palatial and the decks for the use of passengers are not extensive nor wide, the staterooms and dining room compare favorably with many ships now engaged in coastal trade. The time is about nine days between New York and London and the schedule is adhered to with a degree of regularity which has enabled the line to obtain the United States mails. Charging \$100 a passage, these ships are carrying a growing number of passengers (the vessels being one cabin, without steerage) and their cargo space makes them profitable ships.

MUSIC

its Boston season with Verdi's "La taneous and unashamed, were heard Uniform Rank companies are offered Traviata." Evening of Oct. 11, 1926. in Symphony Hall. Whimsied loveli-The cast:

Violetta ifredo. Franco Tafure
stone. Francesco Curci
orgio Germont Lorenzo Conati
aron Dauphol. Luigi de Cesare
r. Grenvil. Natale Cervi
Conductor, Carlo Peroni

A curious if original choice, surely, for an opening opera. "Traviata" not only is devoid of the pageantry regarded as desirable for preluding a season; it has scant compensating qualities. Violetta's familiar aria of the first act; the love-melody; the duet of the first scene and the ensemble of the second scene, in the second act, reveal the composer's inspiration; but the interims are banal, the orchestration for the most part thin, and the plot, of course

Nevertheless, the piece drew to the opera house last night an audience of good size, which was generous in its applause. And those concerned in the production deserved their re-ward, for they all did their utmost with their resources. Mme. Paggi, the possessor of a small but pleasing soprano voice, used it to good advantage, and acted her part with intelligence and fervor. Mr. Tafure distinguished himself by not forcing his excellent voice. One hopes his discretion on this occasion is an earnest permanent vocal reform. Conati, a newcomer this season, has good baritone voice which would make a better impression with

smoother tone production. He could improve his acting in this rôle, too, if he would realize that Germont senior is the father, not the grand-father, of Alfredo.

The orchestra played rather better than in previous seasons. The per-ennial Mr. Peroni directed with his customary authority, and artists and chorus responded faithfully to his demands. On the whole, a well-rounded performance, in which team work compensated for lack of indi-vidual brilliance. And a new style of program book did much to en-hance the gala effect. L. A. S.

Glasgow Orpheus Choir

6 p.m. to 10 p.m. tomorrow evening:

Ward 1—Paul Jones School, Hormany of the honors. He it is who has determined the size as well as the quality of his chorus. And last night it seemed that the ideal number for unaccompanied choral sing-ing had been found. The 50 voices ced a sufficiently solid body of tone for any climax. At need, their combined voices rang and resounded throughout the auditorium. Yet their number was small enough for sinuous, slender weaving threads of silken melody. The voices of the men balanced exquisitely with those of the women, creating sonoritis of a

penetrating quality. The humming of either made a luscious background for the other, yielding an almost translucent foundation tone. One need have no Scottish an-cestors to thrill to such stirring performance of Scotch folk songs as the Glasgow Orpheus Choir encompasses. For not only do the technical excellences of choral singing grace its courses, but well chosen grams, consisting in large part of superb tolk music, are equally in-tegral to its success. The program opened, however, with a psalm tune rather than an older folk tune. To "Stracathro," loveliest of melodies. Mr. Roberton had set a Faux Bourdon for the tenor part, adding dignity and grandeur to the familiar music known to many under title of its opening line, "O for a closer walk with God." Here indeed were fervor and depth, feeling and understand tone, the velvety contours, were but ple, dramatic Order Knights of the means to a purposeful end, and Khorassan. At least 36 organiza-

MINISTER OF FIRST RADIO PARISH SOON TO MEET HIS FLOCK

The Rev. Howard O. Hough to Hold a Mass Meeting at the City Hall in Portland

PORTLAND, Me., Oct. 12 (Special) -A "voice on the air" for the past half year, the "radio minister" of WCSH is finally to meet his flock in person. With preparations practically completed for a mass meeting at City Hall in Portland on Sunday, Oct. 24, at 2:30, at which leaders from various walks of life in Maine will be speakers or guests of honor, the Rev Howard O. Hough, minister portunity and that the work of the of the First Radio Parish, has arranged what is believed to be the first gathering of its kind anywhere for the purpose of meeting in person as many of his "radio parishioners" as possible.

In addition to the speakers, the Rev. Mr. Hough has had arranged an exceptional musical program, part of which will be provided on the great Kotzschmar Memorial Organ in the City Hall auditorium. The First Radio Parish, so called. was organised in early spring of this year, and was inaugurated under auspicious circumstances, ministers or representatives of nine dend tions taking part. The Rev. Howard O. Hough had just previously re-signed the pastorate of the Advent Christian Church of Portland to derote his time to the radio parish, by which he is solely supported, more-over, through subscriptions of his unseen listeners.

Among the speakers and guests of honor who have consented to assist the Rev. Mr. Hough in his project for Oct. 24 are Dr. Kenneth C. M. Sills, president of Bowdoin College; the Rev. James F. Albion, D. D., of Brilliant Scenes at Pageant Brunswick, and former pastor of the Congress Square Universalist Church of this city; Neal W. Allen, chairman of the Portland City Council; Henry F. Merrill of the directorate of the Port of Portland; Harry A. Brinker-hoff, city manager, and Dr. H. E. Thompson, member of the Interna-tional Sunday School Committee.

MEXICAN PEOPLE

American Observer 'Finds New Regime Encouraging Self-Government

By ALVA W. TAYLOR

how to use democratic processes. So element. far as the Indian millions who make ap the masses are concerned, not conly have they never had the tradition of democracy in their governmental affairs in Mexico, but their illiteracy makes it difficult now to assimilate them into a democratic social life.

A part of the program of the Obretonly in that of teaching the youth of the Nation to play modern games. They frankly give more credit to the Y. M. C. A. for initiating this movement than to social life.

for the country. Leaders of the new ranged. order are interested primarily not in mere political power, and certainly not, as was Disz, in a strong politico-economic régime, with wealth and a police-made peace as their ends. Their chief interests are in

national affairs, is interested in education and social welfare rather than learn the game of playing den

A Misunderstanding of Conditions He said: "This is a misunderold, seasoned, party politicians, used to discipline and experienced in the art of debate, so they read number one and every man has a speech to make. After weeks of speech-making they come to realize that after all such matters as budget, taxes, specific regulations to meet Shops Open and Merchants such crises as that of church and state and so forth, are matters for experts, and they wisely conclude that the best thing to do is to call in the experts.

"So they turn the whole matter over to the executive with instructions to act on certain principles. For instance, when the new Governwas established, there was great need for reform of the tax laws. In fact, the whole system of taxation demanded revision, but there was not in the entire Congress any group who could conscientfously presume to become responsible for this matter. So the only solution was to authorize the executive to revise

This he did by putting a group of experts at work. They are still at work on the matter of budgets and methods of taxation. When they have studied through a matter and approves the report and issues it. the authorization given him by the Congress, as a law or a regulation. The same system is pursued in regard to other matters, such as the development of internal resources, the building of roads, the regulation of customs, the administration of subsoil rights and claims, and the keeping of the peace."

Not only is there a lack of experience and expertness on account of the revolution making all things new, but there are no well-defined party alignments such as there are in the United States. For instance. the present controlling majority is a coalition of those groups, as they are while they may disagree as much as would a Socialist, an orthodox American Federation of Labor leader, and a business or professional man of today than it has been in six months. the independent idealist type, yet The city does not expect to pull itself get tegether in a common agreement

by practically every governmental one who succeeds by helping him-official we interviewed—they are in-self." experienced in political affairs. Luis Morones, Secretary of Commerce, explained: "You must remember that we men now leading in Mexico are inexperienced in politics. We have all come up from the bottom.

There is not only inexperience in ngress, and a lack of party discipline, but even of any party ortho-doxy. Neither are there any set and customary usages for parliamentary procedure, such as have been developed in the American Congress through party caucus, committee hearings, and whips for partisan groups. Thus there is not only inex-perience, but much provincialism, some demagoguery, no little political

WEE SONGS for WEE FOLKS "Bobbie" "Peter Puppy" and others Words and Music by MARY T. MELLING

self-seeking and a great deal of MEXICAN PEOPLE

emictional idealism, such as revolutions always bring. The result is that not only are debates prolonged, but wordy encounters are occasionally turned into contests of ink bottles and fists. It is all a part of the fermentation of a democracy in the making, with the making subjected to rather high pressure by the spirit of revolution.

There is another element entering in that I am convinced has much to do with it. It is the fact that the Mexican people have never learned to play modern outdoor games such as characterize Anglo-Saxon sports. The games of the children have al-The arts and methods of running cise and personal prowess rathe a democracy are not a gift from the gods nor are they learned in a day.

After more than 300 years of monarchy and dictatorships the Mexican Nation is only beginning to learn

Teaching Youth to Play

Personally I am convinced, as are many more experienced students of Mexican problems, that the Obregon-Calles regime is sincerely beat on adveloping a Republican Government for the country. Leaders of the new ranged.

and a police-made peace as their ends. Their chief interests are in the development of human resources. It is not mere national wealth they are seeking, as did Diaz, but an increase in the standards of living, the intelligence and the national unity of all the people.

So thoroughly is their program one made for the welfare of these povname.

So thoroughly is their program one made for the welfare of these poverty-stricken filiterate masses that the Calles Government is called a labor Government. While it is not such in the strictly party use of that term, it may justly be called such from the standpoint of its program. When we asked a consular attaché who was passing some criticisms upon certain Mexican laws, how they could be repealed or modified be said with a rather cynical footed people of the said with a rather cynical dent Obregon declared, when he handed the keys of office to his such anded the keys of office to his such and the called was inaugurated in this great stadium dedicated in this great stadium dedicat fied, he said, with a rather cynical handed the keys of office to his succryptness, "Persuade the President," cessor, for the first time in 40 years and declared that while congres-sional forms were maintained the his power over to his legally elected Federal Government was in reality successor. This great symbolic act a dictatorship. We took this remark had a significance for the life of the a seasoned Mexican leader, who, new Mexico that went far beyond a while he has been prominent in mere peaceful change of executives It will take time for Mexico to politics, and did not vote for racy. But Americans on this side of the Rio Grande even yet fail frequently enough to make us chari-table critics of the Nation which has never hitherto had a chance to standing on the part of the consular learn. With our inclination at the attaché. It must be remembered that present time to remedy the weak everything is being made over in Resses of too much democracy through the use of strong executive Mexican national affairs. We have, responsibility in administration, we let us say, 250 representatives in the Congress and perhaps 400 articles nation in the fermentation of a new to be acted upon. These men are not to strong executive control in the name of both peace and efficiency.

HOLLYWOOD, FLA., BUSY REBUILDING

Ready for Winter Season

Rebuilding of Hollywood, one of the cities in the recent Florida hur-ricane zone, is described by Robert E. Rinehart, vice-president of the liam H. Rankin Company, New York City, who has just returned from a visit to the storm-swept section. In describing conditions as he

found them on his arrival and what had been accomplished when he left, he spoke as follows: "Florida's southeast coast knows

how to work in a crisis. It has cleaned away the debris of the storm and it is now busy repairing and rebuilding. I arrived in Hollywood two days after the storm; the scene that greeted me already has been depicted in the press. As I left Hollywood 1500 laborers were busy clearing up the wreckage, scores of carpenters were laying rooms, gardens were being reconstructed, shops were open doing business, and so far as I could observe no one was homeless in Holly

"The city is functioning as municipal government with quicker dispatch and surer results than be fore the hurricane. Many scheduled conventions will be held during this

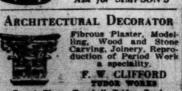

"Much of this quick recovery is due to Joseph W. Young, founder of the city. Upon his arrival he immediately systematized all relief

"Four of the large hotels in the city met with damage but repairs are being rushed and it is believed that rather than parties, who, these buildings will be ready for occupancy again in a very short time. Everything will be in readiness for out of the storm by its own 'boot snoport the Obregon-Calles pro-small straps' but it has turned upon its fund of courage, fortitude and in-Moreover—as was explained to us dustry, to make the come-back of

BRIDGE HONORS PIONEERS SAN FRANCISCO (Staff Correspondence)—Dedicated "to the ploneers who blazed the Overland Trail have all come up from the bottom. We do not belong to the historic ruling class in Mexico. We do not even have the tradition of such a class. We have to learn by experience and we make many mistakes. We are doing the best we can, trying to profit by our errors."

There is not only inexperience in a seven per cent grade.

The Press of the World

HIS FIRST PAIR OF LONG PANTS Uncle Sam! "Some growing, pushing boy of yours that, John."

GANADA'S ENVOY

New York World: The announcement from Ottawa that
Canada will now carry out the longmooted project of appointing her
own Minister to Washington might
be regarded as a result of the outburst of nationalism which followed Governor-General Byng's
recent blunder. The probability is
that it is nothing of the sort, Macthat it is nothing of the sort. Mackenzie King, as a Liberal, emphasizes Canada's autonomy. But so have the Conservatives when in power. In fact, Canada's greatest strides toward international auton strides toward international auton-omy were made during and just after the war, under Borden, a Conservative Prime Minister. The whole tendency of Canadian devel-opment rendered it certain that before long she would nominate an American Minister. The spectacle of Mr. Smiddy acting as Irish rep-resentative has doubless helped resentative has doubtless helped spur the Dominion to action.

In Canada the step will be hailed as a constitutional landmark, and

in England it will be regarded with some misgiving—even the Man-chester Guardian suggests that it is premature. Yet Canada has already carried her independence in foreign affairs very far.

rather slow parachute. It is true that to most eyes the machine looks like a freak; but when one considers that on the ordinary airplane the able them to change the angular the greater number of crashes are due to the fact that the body of the machine is compelled to maintain the high speed of the wings, it seems not impossible that the ordinary air plane should rather be regarded as the plane should rather be regarded as the coarser angle. In a sense, then, the freak, and not the autogiro. The autogiro cannot become stalled, and therefore needs no contrivance for therefore needs no contrivance for analogy ends. overcoming or mitigating the causes

and effects of stalling.

Equally in regard to stability, the simple and ingenious system of first thing to settle is the permissible hinging the wings to the rotating speed of descent: the next point is shaft has eliminated all difficulties due to instability. The causes of into movements of the center of pressure, but in the autogiro any differences of lift on any point outside the central shaft are taken up by the movement of the blades up or down on the hinges.

Afterons Removed

One difficulty arose through actual the municipalities of the various provinces claimed, but which the National system refused to admit was taxable under the provisions of the charters under which the road, when it was the Intercolonial, was constructed. This is the result of a long drawn out demand from the charters of the result of a long drawn out demand from the results of the relative vertical air descent; the relative vertical air velocity due to this will increase the relative mean angle of incidence, and therefore tend to restore the rotational speed." Mr. Wimper's furtional speed. The relative mean angle of incidence, and therefore tend to restore the rotational speed. The relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical air velocity due to this will increase the relative vertical t were unnecessary, but that they were suits of experiments with successive rather "comforting." As a matter of types.

Risk of breakage in the stress prob

> Perhaps the most serious objec-tion to the autogiro which may be raised will be that it may prove incapable of carrying a big commerthat there is no known definite reason why this should prove to be case. Admittedly, however, there will be no immediate move toward a commercial or military type. After all, in airplane development there was no rapid increase of size, and at every stage difficulties were met. Even now every additional stage in size development brings its own very serious problems. It can, however, be claimed for the autogiro that, so far, the experts who are considering the problems are convinced that for every increase of power a satisfac-ory type of "windmill" will be found, its speed of rotation and its angle of pitch adjusted to the job it is intended to perform.

> Autogiro Better Than Helicopter Meanwhile Mr. Wimperis shows that the autogiro is far superior aerodynamically to any helicopter so far tried, and that the fall-retarding effect of the windmill is greater than that of any parachute carrying the same load and of the same diameter. The autogiro is not a helicopter, and it is not faced by the almost in-soluble problem of the helicopter, which must, in case of engine failure. be provided with some contrivance for reversing the direction of rota-

Mr. Wimperis likens the effect of the autogiro to that of the flapping wings of birds. One is reluctant to mention such a popular analogy lest

DISARMAMENT WORK REVIEWED

Ground Covered by Commission Is Surveyed and Results Shown

GENEVA (Special Correspondence)

— The adjournment of the work of the committees of the Preparatory Disarmament Commission at Geneva affords a good opportunity for a survey of the ground which they have

In the first place the experts have ceeded in defining armaments and drawing a distinction between visible peace armaments and the potential factors of war which deend on the industrial resources, and the economic and financial strength of a country, its geographical position, its railways, and so on. the French insisted that the potential ctors were of great importance in arriving at a standard of comparison for the reduction of armaments, it was eventually decided that no

mathematical formula could be found for an exact estimate of these factors. The importance of this decision lies in the fact that the problem of an agreement as to a limitation of armaments is thus narrowed to actual armies, navies, and air forces and their equipment, although the "uitiwar strength of countries is still to be taken into account. Standard of Measurement

The military sub-committee then tackled the important question of the standard by which it is possible to measure the armaments of one country against the armaments of another, and some of the keenest debates took place on this highly technical problem. The French tried to limit the ratio of comparison to the effectives of the peace armies and their immediate equipment in mobilization, which would have excluded not only reserves of men and but also recruits who had re-

ceived less than six months' training. Naturally the Germans, who are not allowed to pass any of the soldiers of their small army of 100,000 men into a reserve, and whose stocks of guns and material are strictly limited and controlled under the Treaty of Versailles, objected to the French proposal. Their objection was supported by the American and British delegates, and the French proposition was so obviously unten-able, if the scales were to be held evenly, that the French had finally to admit that the reserves should form one of the standards for comparison, although they persuaded the com-mittee to whittle down the importance of the reserves by declaring that they were no standard by them-

The French Method

If the French had had their way, they would have reduced their peace army to one-half its size for purposes of comparison by the exclusion of the recruits who were not fully trained, while the whole of the Gerinto the scales, including the police army would have been placed, for the soldiers of which according to the tection against battleships French theory, had a higher military cruisers. value owing to their longer training. The si

that "reduction in armaments is the first step to peace," make no impression on the Brench psychology by insistances be easily adapted to military uses. The Germans argued to slating on the moral aspects of disarmament or predicting the dire realists which may follow from a competition in armaments,—for it will not, as Lloyd George pointed out at Versailles in March, 1919, be possible to keep Germany permanently disarmed if she is surrounded by other countries which are heavily armed.

Safety First All these arguments are as yet of inary discussion only, and who, from no avail as far as the French General the very nature of their profession Staff is concerned. France, they say, as military men, cannot be expected cannot reduce her armaments until to devise measures by which a her security is assured; they must have proof that she will be absolutely safe against sudden attack. In short, the French generals are wait-ing to see what effect the Locarno Pact will have in improving Franco-German relations, and from this point of view it is a pity that the dis-armament discussions could not have been delayed until after Germany's

Yet the discussion has been useful. if only for its revelation of the French attitude toward disarmament, and the extraordinary difficulties which face Europe in arriving at a which race Europe in arriving at a disarmament agreement. Armaments have been defined and classified, standards of comparison have been established, and the value of potential armaments, or the industrial resources of a nation, has been admitted to be incalculable as a mathematical factor, with a mathematical factor and a mathematical factor.

Control of Armaments

Richly Colored Textiles Made by Early Coptic Weavers

MONG all the handicrafts of Greek mythology were favorite sub-various races, perhaps none is jects and are portrayed in what ar-of more universal interest than tists call a plastic-naturalistic treat-art of weaving textiles. In these ment.

Among the specimens which have the art of weaving textiles. In these one sees the advance from the savage state in which men wore, according to the climate, skins, or girdles of dried grass, or a fabric created by human ingenuity and by the skill of that particularly marvel-lous instrument, the human hand. As civilization progressed, specific characteristics appear in the textiles of different races.

Thus are found, first of all, the raw materials which lay at hand in the immediate environment of the race. Later, when materials which obviously came from distant lands made their appearance, one has a measure of the degree of advance-ment to which travel and commerce had attained. Equally revealing are the colors and designs employed Finally, human ingenuity displayed itself in the manner of the weave.

Copts Subject to Many Influences These reflections were suggested by a recent visit to the Metropolitan luseum of Art in New York City on an occasion when there were dis-played some new specimens of Cop-tic textiles, of which the museum possesses one of the best collections in existence. These accessions consist of 17 pieces of unusual beauty presented by George D. Pratt. They are unusually rich in color and show great fertility of design. The Copts were the early Egyptian Christians. The name is a modification of the Arabic word "Quubt," which is itself a corruption of the Greek word for Egyptian, "Aigyptioi." The Coptic language, in fact, is the final stage of the old Egyptian tongue, but since the Greeks had come into power, holding sway over the land from their splendid city of Alexandria, the language was written with Greek letters instead of with hiero-

While the first Christian congregation in Egypt was founded in Alexandria in the second half of the sec-ond century, the national Coptic church did not have a definite organization until the middle of the fifth century, at which time Constantinople was the seat of government for Egypt. Later, early in the seventh century, Egypt was for awhile under the rule of Persia.

From this brief outline of history,

the fact becomes clear why the Cop-tic textiles show many influences the Roman and the Persian as well as the Christian, the Greek, and the ancient Egyptian.

Characteristic Pleces These textiles are richly decorative, not only because of their splendid colors, purple and crimson, yellow and green and blue, but because of the diversity of the figure subjects and the ornamental motifs with which they are adorned. Both animals and human heads and figures are much employed; the former include lions and gazelles, camels and deer, dogs and grotesque monsters in characteristic landscapes showing the familiar palm tree.

sunlight, geraniums, and a palm or

Soon, however, American women be-

gan to tire of this greenhouse-like atmosphere of glass walls and ten-

the scheme. This was doubtless pleasanter than the original type of

winter garden, but the new arrange-ment was not a garden at all. It was merely an additional living

room, with a great deal of sunlight

and no more plants than could be

put in any other room in the house.

During the last few years, however, a trend toward simplicity has become

apparent, a desire to simulate as nearly as possible the actual outdoor

garden. The following is an example

of a modern garden room, simple,

Subdued in Tone

square-a comfortable size, but not

extravagantly large. It is at the end of one wing of the house plan, and

it has consequently been possible to have three walls composed entirely

of glass. The usual six-by-ten panes,

separated by white wood mullions,

have not been used. Instead, the panes are very small, about half the

usual size, and are separated, not by wood, but by lead. Brilliant colors in woodwork and decoration have

been avoided, for in the great amount

of sunlight they seem garish. The rôle of color is left to the flowers.

The fourth wall, through which is cut the door from the living room, is finished in the usual clapboards of the rest of the house, painted a

dull green. This same shade of green, almost olive in tone, is used

in the hangings. There is one hang-ing for each glass wall, and they are all kept drawn entirely back into the corners except when the sunlight

becomes unusually strong. Sunfast gauze has proven to be the most satisfactory material for garden-room hangings. It will be seen that

are depended upon for brilliant color

These, of course, indicate the Helleanistic influence. Others show Exprt. are not only garments but These, of course, indicate the Hellenistic influence. Others show Christian motifs, the Cross appearing as an emblem. One specimen among the recent accessions which is dated as belonging to the fifth or sixth century shows three figures with nimbuses. The one in the center, which is standing and holding a staff, is supposed to represent Jesus, while the kneeling figures on either side are doubtless two of the like that of the enamels which were popular then.
The finer specimens were undoubtedly woven by professionals gifted with artistic taste and the requisite skill for making it effective. From some of the ancient papyri of the Hellenistic period it has been learned that there existed great guilds of professional weavers. However, so many of these Coptic pieces, both whole garments and fragments, have been preserved that it seems quite certain that weaving was likewise a common home indus and at so many periods. Probably the Egyptian peasants or fellahs made most of their own garments,

copying designs from other fabrics or, perhaps, from cherished pattern books passed from hand to hand.

succession of flowers in all shades of colors from January until the frosts.

November is a good time to lay out the rock garden. A few slabs of sandstone are admirable for the purpose, though, if not available, it is usually more economical to use the local stone of the district. The slabs should not be placed too close together, as the most effective method is to leave small bays and embrasures of earth between in which to mass the rock plants. When planting is carried out, careful thought must be given to the juxtaposition of colors as many lovely effects can be greatly intensified, or totally marred by the vicinity of certain shades; for fastance, a scarlet potentials placed next to a cerise dianthus is not at all a happy combination, but a mass of purple aubrietia with yellow alyssum saxatile on the one side, and a cluster of blue scillas on the other gives a delightful effect.

Any vacant spots should be filled up with some of the smaller bulbs, planted in small clumps, which will planted in small clumps, which will result in a succession of color, starting in January with the green-collared, yellow-faced winter aconites, followed in February by snow-drops and the blue scillas, and car-

collared, yellow-faced winter acc-nites, followed in February by snow-drops and the blue scillas, and car-ried on in March and April-by the charming miniature daffodils, and

Chivers Olde English Marmalade

A good breakfast - that's the proper start for the day. It disposes you to cheerfulness. Now Chivers' Olde English Marmalade is the crowning glory of the perfect breakfast. It contains nothing but selected Seville Oranges and Refined Sugar so skilfully blended as to preserve the valuable properties of the fruit. Your Marmalade . . makes breakfast worth while," writes a user.

British Radio Art Shows Great Advance Over Last Year

LONDON (Special Correspondence) -A beautiful silver rose bowl which is really a loudspeaker in disguise and a receiving set which works 200 headphones and 12 loudspeakers with the greatest ease were two of the most intriguing of the wonders to be seen at the first National Radio

Extraordinary ingenuity has been shown by many of the makers in the designs adopted for both loudspeakers and receiving sets, many of the latter being inclosed in cabinets of quite unusual beauty. Even aerials can now be purchased which to the uninitiated present themselves s nothing but artistic and well-designed lampshades, while the camouging of loudspeakers has been carried to the limit of inventiveness.

One of the most interesting takes the form of a picture, framed in the ordinary way and hanging at the usual angle on the wall, and it is only on looking behind it that it is possible to see that it is provided with all the mechanism of a loud-

Articles such as these are, of course, priced rather higher than the more ordinary models, but there ranging from a few shillings to £185. One of the most ingenious and original of the receiving sets is a it is not as though the improvements container in a portable cabinet, con- in design were only improvements taining valves, batteries and loud-speaker. It is worked by a single ponent part of the various types of touch of a switch, without aerial or earth, and is described by its inventor as anticipating the improvesulting in increased efficiency and

Condensers Compared

ong the Interesting Exhibits at the National Radio Exhibition in London Were These Two Condensers, identical in Every Way Except Size. Since an intri-cate Vernier Gear is Built Onto the Back of Each of These, the Construction

Involved a Great Deal of Special Work. trouble of renewing betteries and echarging accumulators, making use instead of the household electricity supply, while an even more novel invention is a time switch for use with receivers. By the insertion of plugs in sockets round the face of clock the switch is automatically turned on at any desired time. The insertion of one plug keeps the set in action for half an hour, two for an hour, and so on, and there is said to be an error of not more than a minute or so in its working. From this it will be seen that nov elties are on the increase, and whatever their value from the purely technical point of view, there is no is plenty of variety in the matter of cost to suit all pockets, the prices question that they act as a stimulant to the industry by the attraction they have for the ordinary pubilc. And

wearing quality, and there is hardly Other exhibits which are attracting a department of wireless in which attention are several forms of bat-tery eliminators, which save the compared with last year.

QuestionBox

I intend to rebuild my audio amplifier, using a high-grade transformer and two impedances. What is the correct sequence of these units? It would seem to me that placing the impedances frawould avoid amplifying any possible distortion in the transformer. However, Rauland and other authorities show the transformer first. I would appreciate your opinion. F. L. W., Lewiston, Me. (Ans.) An effective arrangement of transformer nrst. I would appreciate your opinion. F. L. W., Lewiston, Me. (Ans.) An effective arrangement of these parts would be to use the transformer last. While this may seem like putting the cart before the horse it is not the case, since any distortion the transformer might introduce would be amplified to the same degree in whatever position it might be placed. The reason for suggesting that it be used last is that on a strong signal the last tube is working under a pretty heavy load and with a gridleak some difficulty might be experienced at times in discharging the grid. Using a transformer at this point gives you a direct grid return which will obviate this possibility. Please remember that this is not a royal command but merely a suggestion, as there is merit in the ordinary arrangement as used by Rauland, etc.

better word, the automobile industry vocabulary has been called upon and this form is known as the "chassis." It makes for sturdiness and a certain amount of permanency. Some think this innovation is the first step in the drop of yearly models as these sets seem to be built to last 10 or 20 years.

to good dings

There are a surprising number of sets with built-in eliminator devices. Next to the progress in tubes, advances in the power supply field are the greatest of the past year. Eliminators taking their original power from the house lighting circuit are on exhibition in every form.

It would appear that every labora "plexes" and "dynes" of previous radio years! The exhibits at the fifth annual Chicago Show at the Coliseum are nearly as standardized as are those seen every year at the automobile show held in the same big auditorium.

It would appear that every imporation tory that was not working on tuned radio-frequency receivers must have been working on battery substitute devices. Although "B" eliminators have been on the general market for over a year, the "A" substitutes have been few in number. This year, however, there are several new year, however, there are several new Generally speaking the circuits are ones on the market and some even well defined as to favorites, with combine "B" and "A" eliminators. The set-building contest between

bave led to noticeable improvements in the audio amplification end.

Silken canoniae Isles, whose prize-winning sets are on exhibition at this show.

Registered at the Christian Science Publishing House

Among the visitors from various parts of the world who registered at the Christian Science Publishing pilcity of speration, purity of tonal reproduction, and adequate and beautiful housing in cabinets that make the radio receiver fit to adorn any drawing-room and the decorations carry this to an end.

In all there are 300 exhibits that are revelations of the decorator's art. The Radio Manufacturers' Association, which is in charge of the show, has spent more than \$100,000 in providing the general setting, so that the Chicago radio show will prove to be fully in keeping with the tremendous strides that have been made in radio.

Fully 3000 receivers of every description and every imaginable kind of accessory are on exhibition. These receivers and accessories cover a wide range of price as well as design.

Shielding is predominant in many of the sets this year. Shielding in some form seems to have been adopted by all the leading concerns. Individual shielding of stages seems to be favored, but there are a number of acts. House yesterday were the following

HAVE you renewed your subscription to the Monitor? Prompt renewal insures your receiving every issue, and is a courtesy greatly appreciated by The Christian Science Publishing Society.

Since that time the motion picture adapted by Charles F. Reisner and has become one of the four leading D. F. Zanuck from the play by Bruce

been made into an amusing screen comedy, with Sydney Chaplin taking the part of Old Bill, and the Vita-phone has been used for orchestral accompaniment and preliminary divertissement. A lighter program of events has been arranged to go with this Chaplin picture than is the case at the Warner Theater just across Broadway where the first Vitaphone bill is still holding strong.

For further acquaintance with this remarkable new contribution to the screen, a series of Vitaphone sketches introducing Reinald Werrenrath Elsie Janis, Al Jolson, George Jessel, Willie and Eugene Howard, a quaret of instrumentalists, and the phone orchestra under Herman Helvarying effect, some of these enterchamber with greater success than sound concurrently with moving mages projected on the screen, for it is as vet a somewhat temperamental form for long stretches and then, without apparent reason, frisking about raucously with false tonal fringing and swellings.

But in the light of what has al-

ready been accomplished, it is perhaps a better policy simply to assume that in its initial stages the Vitaphone may be pardonably ex-cused for such shortcomings, knowing full well that those gentlemen se combined efforts have produced this far-reaching mechanism will not rest until they have carried their work to perfection. Mr. Werrenrath and Mr. Jolson were the most enjoyable performers through the Vita-phone Each of the artists are shown in character with quite elaborate but stagey settings, and it seems capto say that the illusion of the Vitaphone will be enhanced when greater skill is brought to bear on the ordering and photographing of

Throughout the picture the Yitaphone renders a fully scored ac-companiment, the musical web being interspersed with natural and human sounds when needed. However, it is disappointing to find the score failing to synchronize at times, particularly in scenes with the troops on the march. The first two-thirds of the COPENHAGEN (Special Corre- musical accompaniment came more spondence)—"Candida," by G B. or less indifferently to the ear, but Shaw, has recently been performed during the last 20 minutes or so for the first time in Denmark, at the

Brothers.
For the second time, Warner
Brothers present the Vitaphone in onjunction with one of their fear refilms. The well-known Bairns, ther opus, "The Better 'Ole," has en made into an amusing screen medy, with Sydney Chaplin taking, part of Old Bill, and the war of the second time way through the analysing of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the second time way through the analysing the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the second time way through the analysing the familiar figure of Old Bill, and the war of the second time way through the analysing the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the familiar figure of Old Bill, and the war of the war of the war of the war of the work of the most of the most of the stage unders and there are find one of the most active figure.

Although Theater, and interesting composer, and can develop the most of the dear of the most of the most of the most of the taster and interesting composer, and one of the most active figure and one of the most active figure and one of the most active figure.

Although Theater, and interesting composer, and one of the most active figure and one of the most active figure.

Although Theater, and interesting composer and one of the most of the most of the most of the war of the most of the most industries of the Nation, with an international scope that is amazing in its possibilities. After three decades rected by Mr. Reisner for Warner the village where Old Bill's regiment the village where Old Bill's regiment to the village where great success. Jack Ackroyd, Ed Kennedy, Harold Goodwin, Doris Hill, Charles Gerrard, Tom McGuire, Tom Kennedy, Kewpie Morgan and Arthur Clayton are the featured members of the cast. The picture is plausibly set, and the atmosphere of British billets is well worked out.

Dix in "The Quarterback"

NEW YORK-Rivoli Theater, "The

adapted by Ray Harris from a story revolution. by W. O. McGeehan and William S. McNutt, directed by Fred Newmeyer tainers emerging from the recording for Paramount. Although the college picture seems in danger of becloak the essential excellence of this ing classed with the golden-egged wonderful invention for reproducing goose, there still seems room for one more—when it is as good as "The Quarterback." Richard Dix makes this picture a delight from piece of mechanism, running true to start to finish by as finished and form for long stretches and then, sincere a piece of screen acting as he has ever given. It looks an easy thing to play such a rôle as falls to him in this latest film of college rivalry, but to give it the right ring and make each situation tell is some thing that requires an advanced screen technique and understanding. All the more when Mr. Dix is obviously far from being the budding

freshman type.

The whole atmosphere of this college story is curiously adult, but without affecting the general interest in the tale. Perhaps the quaint fact of Elmer Stone having spent 27 years as an undergraduate at Clinton University, all because he had pledged his word in his early days to his young wife to stay at this college until it had achieved a football victory over the rival State University was responsible for the mature crowd of boys and girls that are seen gathering for another entering class. Mr. Dix plays the part and releases his Ancient-Mariner of a father from further matriculation.

through. Esther Ralston adds charming touch as the co-ed of the rival university, and Harry Beres-ford, David Butler, Robert W. Craig, and Mona Palmer are the principal this past winter and bids fair to be Dagmar Theater, Copenhagen, and color, and at times the score brought, players. A full-fashioned football is shown toward the end of the film, with some fine mid-scrimmage shots and the general hurlyleft the Paramount fold, went into been acted at both the State The-independent production during this ater and the Dagmar Theater, where past year, and his big studio at they have won the favor of the thea-Culver City has been going full ter-loving and critical Danish public. leries devised by the Hollywood com-"The Quarterback" is one blast with an increasingly ambitious Now that "Candida" has been pro- edy constructors than the more screen comedies seen in a long

The Art Theater will vary its usual repertory of Gogol and Ostrov-sky and Gorky with several foreign classics, including Shakespeare's Tom Gibson from the play by William "Othello" and Æschylus's "Prometheus." A less substantial new offering is a French comedy, entitled "Profiteers of Glory." A play modeled on "White Guard," a navel by the Russian writer, Mikhail Bulgakov, promises to be one of the most interductions. Bulgakov's novel is a poignant picture of a Russian intellectual Quarterback," a motion picture family caught in the whirlwind of

Melerhold announces a new and original production of Gogol's classi-For the rest he offers his old line of topical satires, with the anti-imperi alistic propaganda play "Roar China, which achieved a considerable meas ure of success toward the end of last

Somewhere between the Art Thea ter and Meierhold stands the Moscow Kamerny Theater, which pursues aesthetic innovations without going on the trail of political revolutionary propaganda. The Kamerny has a mixed repertory, one or two light comedies alternating with such tragedies as Racine's "Phedre" and Os-car Wilde's "Salome."

The Musical Studio of the Art Theater is offering its old attractions, Offenbach's "Perikola," Aristophanes' "Lysistrata" and "Carmencita," together with a few new productions which give the cast of the Studio an opportunity to realize their artistic ambition of a balanced musical drama, in which the arts of singing, acting and dancing are expressed with an equal degree of

last year ended the season without a deficit. But the regime of economy leads to a sparing production of new operas. Moussorgsky's "Boris Godunov" is to be revived, after a long of the younger Stone, who eventually lapse, during the coming season wins the annual game for Clinton, One or two experiments in the operatic treatment of revolutionary themes will also be attempted. The picture is ably directed, with A special committee, neaded by clever bits of business sprinkled all the noted conductor, V. I. Suk, has been organized for the purpose of commemorating the Beethoven centenary next March. The Persimphans, Moscow's leaderless orches-tra, which is steadily gaining in prestige and in the soundness of its financial situation, will co-operate

by giving five concerts devoted ex-

Special from Monitor Bureau

NEW YORK—Rialto Theater, "Kid Boots," a motion picture adapted by Tom Gibson from the play by William A. McGuire and Otto Harbach, directed by Frank Tuttle for Paramount.

In presenting Eddie Cantor to the screen world, it has apparently been the aim of his sponsors to present him in the most popularly appealing way possible. Due consideration has been taken of his well-known qualities as light comedian, but no chance has been allowed to enter into the calculation for making this début anything but a box-office certainty; with the result that Mr. Cantor, who comes through the screening process remarkably well, is pretty much swamped in a whirlwind windup of cinematographic ingenuities so carefully devised that they stamp the event with an unmistakable largeletter label the veriest fly-by-night

placed in her, and in this case she modifies her facial play with commendable results, emerging with something more than a bagful of that a little exaggeration would be considered to the constant of the con The Moscow State Opera House clever tricks. Mr. Gray is always a throw entirely out of key. Every dependable fellow in any romantic situation, and his pleasant screen in any city, for that matter, knows qualities should be carefully watched and developed. Natalle Kingston, man, wherever he may be, to the qualities should be carefully wakched and developed. Natalie Kingston, Malcolm Waite, William J. Worthing-life. Clara Blandick is delightful as ton, Harry von Meter, and Fred Esmelton are also in the cast. As for Mr. Cantor's screen future, his able and, on one occasion, brilliant pantomime in this first film venture should gain him more closely conforming vehicles, instead of letting such good material he set back by a Sennett lesser rôles. material be set back by a Sennett washout. Technically the race along lusively to the works of Beethoven, including all the nine symphonies.
"A questionnaire addressed to our

"The Good Fellow"

event with an unmistakable large-letter label the veriest fly-by-night disillusioned, however, when the letter label the veriest fly-by-night could not forget.

So the amiable and appealing Mr. Cantor, plus this aforesaid last-real agitation, plus the harmonious melodies of the original "Kid Boots," make the occasion quite auspicious for Paramount. The first part of the picture is well-handled in Mr. Tuttle's brisk and engaging way, with a gentle story unfolding consistently and plausibly. Clara Bow, Billie Dove, and Lawrence Gray all help to make the history of the upspringing tailor's apprentice more than just acceptable; but, as happens in so many films that start out to characterize with any consistency, such considerations are cast to the four winds to make a cinematographic holiday.

Miss Bow is beginning to justify the faith which Famous Players placed in her, and in this case she modifies her ferical play with com-

lesser rôles.

There is something slightly faulty the cliffs and the episode of the tee-tering rock are splendidly accom-plished, the double exposure being so well done as almost to defy detection.

R. F.

There is something signtly in the structure of the second-act but that will very likely be remedied, and when it is Crosby Gaige will have a fine performance to his credit.

FRANK LEA SHORT.

Bacon's Place Beside Shakespeare

LTOGETHER strange and at the "Antitheses of Things." As an illustration we may quote the antitheertain silence in this year of DELAY 1926: strange, "most passing strange," forsouth, is the complete silence of the "Baconians" in this that is in a hurry, which she gives tercentenary of Baron Verulam, Vistercentenary of Baron Verulam, Viscount St. Albans, for we should naturally expect loud demonstrations on their part to counterbalance the similar Shakespearean celebrations just a decade ago; encouraging, because all signs point to the long-delayed end of a curiously persistent human crotchet. At last! But how widespread this vagary which has been troubling the mass of the people as no other literary assumption le as no other literary assumption modern times! I shall never forget the expression of eager relief in the eyes and on the lips of my postman as he came up my steps the next morning after I had broadcasted a talk on Shakespeare, giving him talk on Shakespeare, giving him credit for his own plays.

So, Baconism is relegated to the mbo of the curiosities of literary history. No responsible person who can pretend to any knowledge of can pretend to any knowledge of put off too late, by circuit. cis Bacon. But the great Lord Chancellor needs no credit for other men's works. His own achievement in opening the way for modern methods of thinking, his unique service to nglish prose, and his vision of a ew Atlantis are sufficient to establish his claim to greatness.

century. It witnessed the first publication of any dramatist of all time:

"Richard II"; "Richard III"; and "An Excellent source."

"An excellent sour yes, Religious Meditations. Places f perswasion and disswasion. Seene nd Allowed. At London, Printed for short "essays." But they opened a new epoch in the expression of thought in powerful arresting English, just as Shakespeare's first published plays inaugurated a new era in the world's drama. + + +

To such a sub-province." To such a sub-praction of faith he might the rayines and floating up toward lime declaration of faith he might have added, "And I have discovered the key to unlock the doors of undreamed knowledge and placed it in the hands of my fellow men." All of us who live in the modern, therefore, are Baconians; we are his intellectual heirs. Our critical and exploratory attitude we owe directly to him. And without any assumption of his authorship of works which he could not conceivably have written, we must accord to him a place alonged of Shakespeare as the herald of a new world of knowledge. P. K. Summer's Away!

Written for The Christian Science Monitor

Summer's away—posthaste— Cry her "Farewell!"

What though her arrogance hardened the heart! Shall it be said that we let her depart Unattended by grace—at the start?

Daughter of Emperors! Something is due, Run by her coach for an hour or two, Lift the bright mullein to view!

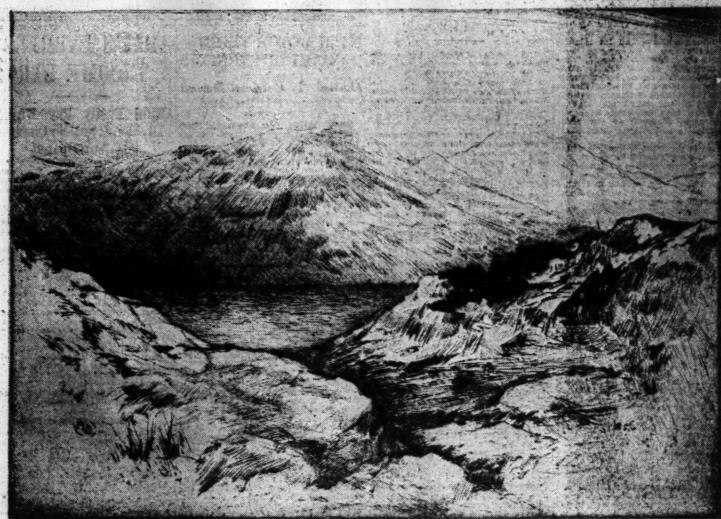

Under her Libyan lash labored we sore; Yet, toil as we might, still she toiled on before, Ever she labored the more. Now that it is over she stays not for sain, Posthaste she speeds to her further domain; Treasure and rest here remain.

Hasten our pace, for she gains on the way Would she might turn, though she may not delay! Summer! Great Queen, hear us pray!

See then! she slackens, she stays, turning slow. Lyes whence the lightnings once scathing did go Now gentlest blessings bestow.

Summer's away—posthasic— Cry her "Farewell!"

delight that comes over us at the first conscious glimpse of earth's beauty. Our first sunrise, the first conscious glimpse of earth's beauty. Our first sunrise, the first conscious glimpse of earth's beauty. Our first sunrise, the first conscious glimpse of earth's beauty. Our first sunrise, the first conscious glimpse of earth's beauty. Our first sunrise, the first which he always had ready for clear carol of a wood-thrush that we have ever heard, our first glance at the cardinal flower poised in lonely splendor beside some wood-land brook, our first sight and hearing of wild geese flying southward in the spring—these and other such-like experiences mark the beginnings of epochs for us all. They open doors litto kingdoms of enchantment through which we step with bated breath, never to return. We have accepted beauty theretofore as part of the natural course of things, unconsciously; thenceforward we see it not as something separable, indeed, from the total fabric of our days, but as a shining thread woven through them all.

The lad who stood there at the foot of the bluff and gased in among

As you walked along the beach the shadows, wondering, was not of Lake Michigan, thirty miles above fully aware that this hour was a beways the precipitous bluff of clay, by happiness and by a new sense from eighty to one hundred feet in of the world's wealth in beauty to height, clad with sumac and poplar think at all. Here was an unguessed and vetch. The face of this bluff, and unhoped for extension of experireaching on mile after mile to north ence opening out of what had been country lying inland.

The thirteen-year-old lad, newly that this ravine was only a vestibule

of wandering along the beach. Its presence was revealed to him by a current of cool air blowing suddenly upon him as he walked along grew within it, every bird that sang there, every note of the brook's song, every flutter of sunlight and shadow on the moss, became as beinghs, he saw that the bluff had been cut away in this place by a stream that came down from the higher land beyond, leaving a chasm in the shape of a capital V. When white-throat, there he found the pale pyrola. He learned there to see th exact forms and colors of things and yet, at the same time, to look beyond these fair externalities for the still greater beauty that ways lies beyond them. The ravine taught him to see, to think, and to feel. It set his feet upon the pass of peace.

Heidi's Day With the Goats

And so the time passed happily on till evening. Then the wind began to roar louder than ever through the old fir trees; Heidi listened with delight to the sound, and it filled her heart so full of gladness that see. Some happy bird that he could not name was calling ar within: He pushed aside the boughs that barred the doorway and entered the enchanted chamber.

There and then he set his foot shed.

Suddenly a shrill whistle was

world. Wherever birds sing or boughs are waving he was to be from that day forth always at home Books that he had been reading had prepared him for this discover, and they might have helped him to make it elsewhere if he had never seen the ravine; but as it fell out he always remembered the leafy doorway in the bluff as the place where his path began.

The words we try to find in later years can only suggest the thrill of the source of the standing and began licking his together the boughs are waving he was to be goats came springing one after another in their midst. As they neared the hut the goats stood still, and then two of their number, two beautiful, slender and one brown, ran forward to where the grandfather out of sight behind the high mountains. years can only suggest the thrill of delight that comes over us at the first conscious glimpse of earth's

Truth's Prism

Written for The Christian Belence Monito

THE student of physics is familished his followers to love one an-iar with the science of light. He other, yet mankind has gone on beiar with the science of light. He has learned of the seven pri-nary colors which comprise light, and has seen this demonstrated by the use of a prism which separates a ray of white light into its various hues. The rainbow, too, is an illustration of this. The raindrops, serving as prisms, reveal the varied hues of the sun's rays, producing a phenome-non beautiful in the extreme as the aky. Well may one exclaim with the Psalmist, "The heaven's declare his righteousness, and all the people the true concept of God, we shall at streaks of brilliant colors span the

see his glory"!

In "Science and Health with Key to the Scriptures" (p. 558) Mary Baker Eddy says of Christian Science, "When understood, it is Truth's prism and praise." It reveals Deity as Mind, Soul, Spirit, Love, Truth, Life, Principle. All forms of fear and superstition have their origin in a false sense of God. Uninspired translators of the Scriptures have accorded to Deity qualities He does not possess. This darkened sense or ignorance of God has resulted in infidelity, disease, sin. The writer was healed of infidelity and sickness when healed of infidelity and sickness when she learned the truth that God is Love, and accepted it. How great the

blinding beliefs. For instance, let us consider the term "Mind." God is Mind. Then there can be but one Mind, since God is infinite; hence the world can testify that Christian Sciteaching of many spirits, and the con-sequent fear resulting from this false and Christmas" (pp. 31, 39):

The truth that God is Love gives the hue or quality of God which brings Him nearer to the children of men, and which takes away their fears. How many false fears and doubts take their flight as this spiritual truth is brought out more clearly through the prism of divine Science! Although John uttered over and over again the truth that "God is love," and admon-

rays on her bed and on the large heap of hay, and as she opened her eyes everything in the loft seemed gleaming with gold. She looked around her in astonishment and could not imagine for a while where she was. But her grandfather's deep voice was now heard outside, and then Heidi began to recall all that had happened: how she had come away from her former home and was now on the mountain grandfather instead of with . . . Heidi, shut up

Ursula. . . And Heidi, shut up within the four walls, had often longed to be out of doors. So she telt very happy this morning as she woke up in her new home and remembered all the many new things that she had seen the day before and which she would see again that day, and above all she thought with delight of the two dear goats. . . . "Do you want to go with them on to the mountain?" asked her grand-

father...

The spot where Peter generally halted for his goats to pasture and where he took up his quarters for rocks, which were covered for some distance up by bushes and fir trees, beyond which rose their bare and rugged summits. . . . The valley lay far below, bathed in the morning sun. In front . . . rose a broad snowfield high against the dark hine aky. while to the left was a huge pile of rocks on either side of which a bare. lofty peak, that seemed to pierce the looked down upon child sat without moving, her eyes taking in the whole scene, and all around was a great stillness, only broken by soft, light puffs of wind that swaved the light bells of the blue flowers and the shining gold heads of the cistus, and set them nodding merrily on their slender stems. . . . So the time went on, while to Heidi, who had so often looked up from the valley at the mountains above, these seemed now to have faces, and to be looking

down at her like old friends....

The goats were now beginning to climb the rocks again, each seeking for the plants it liked in its own fashion, some jumping over everything they met till they found what they wanted, others going more carefully and cropping all the nice leaves by the way, the Turk

tains. Heldi was sgain sitting on the ground, silently gazing at the blue bell-shaped flowers, as they

man never has expressed, and n can express, the opposite qualities hatred, revenge, strife, or any o element of the so-called carnal in As we come out of the dark recesses

need, then, that mankind use this step into its rays, we feel the light prism of Christian Science, and get to and heat that it is continually radiating over all the earth. BOSTON, II.X A

BUSINESS IN CANADA SHOWS GOOD PROGRESS

Employment Situation More Satisfactory Than for Several Years

OTTAWA, Oct. 12 (Special)-Indica-OTTAWA, Oct. 12 (Special)—Indica-tions point to continued progress in practically all lines of trade and in-dustry in Canada. Engineering plants are well employed, the railways are unusually busy, domestic trade is on the upgrade, and the employment situ-ation is more satisfactory than it has been for several years.

One of the best indices of the trend of business is car loadings. Figures

of business is car loadings. Figures issued for the week ended Sept. 18 are particularly informative. Grain loadings registered a decline owing to the lateness of threshing; live stock moved in large volume; and coal and coke recorded a substantial increase.

The stability of the wood using in-dustries is disclosed in the loadings, which show little variation from those of the corresponding week last year, although recording a gain compared with the previous week.

Despite the uncertainty of the crop situation, which has begun to show signs of improvement, there is no ap-preciable let-up in wholesale and retail activities. Encouraging reports are re-ceived from all provinces, the majority indicating satisfaction as to the vol-ume of sales and the outlook for fur-

her business.

There has been a decline in the sales of one or two seasonable commodities owing to unsettled weather, but on the whohle there is a general all-round improvement. Clothing manufacturers say that they are receiving a larger number of orders for the finer grades of men's clothing Threshing in West

The latest reports on the crop situa-tion in the West are to the effect that fine weather has prevailed during the last week in Alberta and in parts of Saskatchewan and threshing is gen-

In Quebec the quality of the grain

crops as a whole has been affected adversely by heavy rains during the harvesting operations. In Ontario dry weather during the last week has enabled most farmers to complete their grain harvesting. In British Columbia the harvesting of all crops, except late

pleted.

Considerable interest is centered in the action of the Province of Saskatchewan in rejecting all tenders for its \$2,500,000 issue. The highest bid was a 5.02 per cent basis.

A well-known Toronto financial firm. commenting on this situation, said: "If this means that, for the present at least, Canadian provinces and large cities cannot borrow further at a lower."

cities cannot borrow further at a lower rate than 5 per cent, it is due primarily to the fact that Canadian corporation bonds of high grade are competing keenly with Canadian Government and municipal bonds, alike in Canada and the United States."

Bank Debits Increase

Bank Debits Increase
Offering is now being made of the saue of \$30,000,000, 25-year sinking and 5 per cent first refunding and collateral trust gold bonds of the Montreal Light, Heat & Power Consolidated. The offering is being made by a syndicate composed of Wood. Gundy & Co., Aldred & Co., and the Royal Bank of Canada, at the price of 99.50 and interest to yield over 5.08 per cent.

The bank statement for August, just issued, shows that debits in that month were 27 per cent and 17 per cent

were 27 per cent and 17 per cent greater than in the corresponding

The debits for the first eight months of 1926 amounted to \$19.411.000,000, as compared with \$17,150,000,000 in the corresponding period of 1925, an increase of \$2,261,000,000, or about 13 per cent.

While all the economic areas have

While all the economic areas have reported substantial increases in this comparison, the greatest advance was shown in the Province of Quebec, the increase being about 18 per cent. Ontario and the Maritime Provinces showed increases of 14 per cent and 12 per cent, respectively. The more moderate increase of 7 per cent was shown in the Prairie Provinces, and in British Columbia.

some cases up to March of 1927, and in a few instances, largely inquiries, up to July of next year, is in progress. The tonnages named for fourth quarter delivery by industrial users

industry, however, and the favorable movement of such decisive factors all railroad earnings and building commitments are imparting a confidence to the markets. The iron market is quite firm at present, and the general opinion is that any move will be slightly upward. No fear is expressed, however, of a sudden decisive jump.

Buying Nova Scotia Coal The vice-president of the British Empire Steel Corporation, J. E. Mc-Jurg, has stated that 2,000,000 tons of Nova Scotia coal will be shipped up the St. Lawrence this year and that collieries of Nova Scotia will be operated full time up to Nov. 20. At the moment the corporation has had more orders for Cane Breton than can be

orders for Cape Breton than can be

filled.

An important announcement is that the Governments of Ontario and Quebec have signed a contract with the National Hydro Company for the development of the Carillon waterfalls on the Ottawa River. It is estimated this project will involve an expenditure of approximately \$40,000,000, and that something like 260,000 horsepower of electric energy will be developed.

As the waterfalls are on that portion of the Ottawa River which forms the boundary between Ontario and Quebec, both provinces will share equally in the division of power. A provision has been included in the contract prohibiting the export of any of the power to the United States.

Stock Exchange Holiday

The New York Stock Exchange and other leading stock exchanges and commodity markets of the United States are closed today in observance of Columbus Day.

PACKER HIDE PRICES RISE

Demand Strong Enough to Prevent Accumulation -Calf Skins Slow

The packer hide market is strong with price tendency upward. The demand is quite sufficient to prevent an accumulation of any sort. Packers lifted the entire list up a cent, but after holding such rates for the first two days of last week, sales fell off and offerings were reduced.

At the prices packers concluded to accept, orders were booked to such an extent that stocks available were allocated, and the market returned to the

accept, orders were booked to such an extent that stocks available were allocated, and the market returned to the firm basis it at first assumed. Total sales, including those charged to the tanning account of tanning packers, aggregated well over 150,000 hides.

The primary cause of the stimulation noted in the transactions can be attributed to a tanners' desire to obtain free-of-grub hides the run of which is now short. The position of the packers is such that they may advance prices at any time.

The call for offal is active, although the heavier weights of it are a bit draggy. That leather is moving daily in fair sized lots is admitted, but tanners complain of their inability to get a profit commensurate with the price of hides.

Country hides are reported as well sold up, with offerings meager. Frigorifico hides are firm in price, largely due to heavy Russian con-

price of hides.

Country hides are reported as well sold up, with offerings meager. Frigorifico hides are firm in price, largely due to heavy Russian con-

signments.

Calf skins were slow of sale all the week. Packer calf skins were listed at 20½c and 21c, but bids were scarce. Chicago city calf skins were easy at 18½c asked. Packer kips were been further rains. There will be much tough and sprouted grain, but the extent of this will depend on future weather, as probably not more than 40 per cent of the threshing has been further at 18½c asked. Packer kips were easy to the specific saked. The presumption is that novelty leathers are interfering with the sale of finished calf particular.

larly.
Principal sales of packer hides during the week anded Oct. 9 were:

REFUSES MOTOR BUS CHARTERS
HARRISBURG, Oce. 12—Applications
for charters for motor-bus and freight
transportation companies organized by
the Pennsylvania Railroad and Reading
Company, which have been pending forsome time, were refused by Governor
Pinchot. In announcing his decision in
the matter, Governor Pinchot said applications were a "first step towards securing such a monopoly of bus transportation on the highways of this commonwealth as the Philadelphia Rapid Transit Company already has secured in
Philadelphia. I refuse to be implicated
in fastening any such monopoly on the
State of Pennsylvania, and refuse even
if they offered to pay what that monopoly
is worth." REFUSES MOTOR BUS CHARTERS

GULF STATES UTILITIES COMPANY Gulf States Utilities Company, one of the Engineers Public Service Company group, announces the completion by Stone & Webster, Inc. of the first sec-tion of a new power station on the Neches River at Beaumont, Tex. at a total cost of \$3,500,000.

CHRYSLER CUTS PRICES

CO-OPERATION CALLED KEY TO FARM PROBLEMS

Business Leaders Will Back Sound Relief Measures, Says C. M. Schwab

MINNEAPOLIS, Minn., Oct. 12-MINNEAPOLIS, Minn., Oct. 12— Expressing profound concern over the difficulties which have confronted the farmer in recent years, Charles M. Schwab, on a recent visit to Minneapolis, said all men connected with the development of industry are concerned similarly and that they feel there must be the utmost possible cooperation between the East and the West, "between Wall Street, if you like, and the farmer, in seeking a solution for this up-to-now baffling situation."

situation Mr. Schwab at Minneapolis addressed more than 800 manufacturers executives, business and professional men at a banquet arranged by the Manufacturers' Association of this

city on agriculture and its relation to industry. "It is my judgment," he said, "that

overtake us.

Industry's Problem Similar "I am profoundly concerned over the problem of the farmer. I do a good deal of farming myself up on my place at Loretto, Pa., and yet I do not pre-tend to have an expert knowledge of how to work out the difficulties which confront the farmer who is turning out agricultural products on a large scale.

"I do, however, know something about industry, and perhaps from the experience I have gained in industry I might make one or two suggestions which all of us might consider applicable to our agricultural problems.

"We of the steel business have been confronted in recent years with either stationary or declining press. Likewise we have had to increase wages and reduce hours. And yet in the Bethlehem Steel Corporation, with which I am identified, we have in the last three years, through a program of improvements in our manufacturing plants and methods, been able to maintain or increase the wages paid the in-dividual employee and maintain our net income, despite a decline of more than \$5 a ton in the price of finished

Marketing Big Problem

"Industry has found that its only salvation lies in effecting economy in manufacturing. There are still great wastes in the process of marketing industrial products, and no problem is more important to industry today than that of developing effective and economical methods for placing our

goods on the market.

"And this problem is going to stay with us. We must look forward to the time when our industries will be faced with competition such as we have never had before. Europe is just beginning to get readjusted to new conditions.

onaltions.
"I can foresee the time when the factories of Europe will be turning out vast quantities of goods which will be ments from the prairie provinces. sold in our market and the markets of the world in competition with American goods. European goods are produced at costs far below present costs

efficient and economical production. To maintain our present high wages with reasonable profits for manufacturers, we must realize economies upon a progressive scale, not merely in production, but in marketing methods. "My opinion is that this situation, both in industry and in agriculture, is going to call for co-operation among the factors involved to an extent never before considered necessary or even desirable.

even desirable.

even desirable.

"It is not possible that the farmer has been the first to feel the situation which industry will itself encounter later, and is it not possible that the way out for the farmer will be the way

of industries, farmers, bankers, Wali Street men and ranchers—all of us, get together with the determination to work these difficult problems out to the end that both the farmer and the industrialist shall continue to prosper.'

OHIO FUEL DIVIDEND

PITTSBURGH, Oct. 12—Ohio Fuel Corporation declared a dividend of 162-3c on stock represented by certificates of deposit issued by Union Trust Company as depository to be distributed Nov. 15 to holders of record of Ohio Fuel Corporation on month has been declared to make dividend on the stock of Columbis Gas & Electric Corporation accrue from Nov. 15. More than 98 per cent of Ohio Fuel Corporation has been deposited for exchange into stock of new Columbia Gas & Electric Corporation.

STUDY OUR BUSINESS.

NEW YORK, Oct 12 (P)—European business men are showing an intense interest in American methods of merchandising, says Philip W. Haberman, vice-president of Commercial Investment Trust Corporation. Returning from a two months survey covering the more imporant European countries, he asserted, installment selling was pursuing a steady, normal development. There is now a very wide consideration of American methods with the view to adapt them to European conditions in an endeavor to build up their home markets."

INDUSTRY GAINING **OVER 1925 PERIOD**

NEW YORK, Oct. 12 (49)—Aggregate earnings of \$568,000,000 for the first half of 1926 by about 250 of the country's leading corporations, indicate that business profits for the year will set a new high record, it is stated in the current issue of the American Bankers' Association Journal. This figure compares with \$470,000,000 in 1925, a gain of 21 per cent.

Of industrial corporations' reports published, 65 per cent ran ahead of the last year and only 35 per cent fell behind. "This evidence of prosperity," the report said, "is impressive, particularly in view of the misgivings felt in many quarters a few months ago as to the current year's business.

CROP FORECAST

WORLD WHEAT

Better European Conditions Expected to Increase Demand for Grain

The world over, increased prosperity increases wheat consumption, and wheat production itself is one factor in that prosperity, says the Royal Bank of Canada in its monthly letter. When Canada produces a large wheat creased.

The Canadian farmer then purchases

more goods from the cities and towns, and the purchasing power of the in-dustrial worker is increased and he, in turn, buys more wheat, with the result that Canadian wheat consumpresult that Canadian wheat consumption tends to be higher in years of good crops than in poor years.

Forecasts and estimates for the wheat crops in 27 countries in the Northern Hemisphere, producing about 85 per cent of the world's wheat supply, indicate a total production of 2,861,000,000 bushels for 1926, an increase of 1.2 per cent over the production of those countries in 1925. No record crops and no crop failures have record crops and no crop failures have been reported, and a more normal world distribution of the crop is to be anticipated this year than in the last

few years. Last year, Europe's large crops resulted in unusually small shipments to European ports, while the surplus supply was absorbed by heavy shipments to the colors. ments to the Orient.

ments to the Orient.

Since crops of European importing countries promise to be smaller than last year and their carryovers are moderately low, and since larger supplies promise to be available in exporting countries as a whole, international trade in 1926-27 is likely to be somewhat larger than in 1925-26, but smaller than in the two preceding years.

periods in which preferred was outstanding.

As Nash's fourth quarter is usually the best it would not be surprising if profits in the current three months establish a record. Based on the present outlook, indications are that for the somewhat larger than in 1925-26, but smaller than in the two preceding years.

This would be practically double the

years.
Steady improvement in European stability is a further factor which gives promise that Europe will continue to buy wheat in good volume in the face of crop reductions this year. Constant study of the course of prob-able future demand is just as im-portant a factor in the world wheat situation as are estimates and fore-

casts concerning supply.

The official estimate of Canada's current wheat crop was revised upward on Sept. 10 to 399,008,000 bushels. Since that date, however, adverse weather conditions have prevailed in the prairie provinces, resulting in a general low-ering of grades, not only of wheat, but also of coarse grains. Reports indi-cate, however, that the volume of production will not be seriously affected A good portion of the wheat has been cut, but very little has been threshed. This situation is reflected in the current car-loading figures, when the weekly car loadings were smaller than in 1925 for the first time this year

CANADIAN CAR LOADINGS Car loadings on Canadian railroads for the week ended Oct. 2 were 77,249, compared with 75,937 for the preceding week and 74,872 for the corresponding week of last year, while receipts from connections were 38,392, compared with 40,424 for the preceding week and 35,898 last year. To Oct. 2 this year loadings were 2,312,434, compared with 2,090,414 last year, and receipts from connections were 1,450,903, compared with 1,292,526 for the similar period in 1925.

MACON, Ga., Oct. 12—The southern half of Georgia has a good crop of cotton which is now being baled as rapidly as it can go through the gins. No evidence of a holding movement is seen here. Producers are pushing cotton on the market. Local mills and spot dealers, not only here but throughout southern Georgia, are the chief buyers. They are not competing with one another and are taking all the cotton that is offered.

WENTINGHOUSE ELECTRIC
Bookings of Westinghouse Electric &
Manufacturing Company for the quarter
ended Sept. 30 totaled \$41,250,000, compared with \$44,860,000 in the preceding quarter and \$43,285,000 in the corresponding quarter a year ago. Billings
for the quarter ended Sept. 30 are estimated at \$46,700,000, compared with
\$45,140,000 in the preceding quarter and
\$40,170,000 in the like quarter of 1925.

NASH MOTER THIRD **QUARTER EARNINGS**

Outlook Is Good as Record September Is Reported

NEW YORK, Oct. 12-While Nash Motors earnings in the third quarter were somewhat lower than in the second quarter the falling off was due to voluntary curtailment of operations during June and July for the purpose of bringing out a new series of

models.

In the current quarter the comany is back on a capacity schedule. Shipments in September were between 15,000 and 16,000 cars, and a correspondingly high rate of output is in prospect practically up to the close of the company's fiscal year on Nov. 20. earnings for the last two years:

This would be practically double the \$4 dividend now being paid annually in the form of a 50-cent regular quarterly payment, and 50 cents extra. Growth in earnings has been a direct reflection of the remarkable expansion in the company's sales this year. For nine months to Aug. 31, a sales volume well in excess of 100,000 cars had been reached, which was

larger than the total number of cars sold in any previous 12 months in the company's history. The introduction of a new light six last year has been largely responsible for this gain, although the company's regular six-cylinder 'line has also shown large increases over preceding

BUSINESS EXECUTIVE THINKS EUROPE WILL PAY HER WAR DEBTS

NEW YORK, Oct. 12—Europe is talking less about cancellation of war lebts than America, in the opinion of High Book Value C. A. Hobein, vice-president of John Nickerson & Co., returning from two months abroad. "It is my opinion that Europe will faithfully carry out her debt settlement," Mr. Hobein said.

High Book Value

Its \$6,608,000 surplus at the close of last year could not be applied to common stock because it was arrived at after carrying the \$11,904,300

try is active and business as a whole

rapid progress toward normal pre-war

"In all the principal cities of the Continent the housing situation is acute. New buildings are badly needed and a great deal of capital will be required the next several years to make up for the lack."

Commercial failures in the United States in the third quarter of 1926 are compiled at 4635 by R. G. Dunn & Co., slightly below the 4663 for the corresponding period last year and about 24 per cent less than for the first quarter this year. Indebtedness of \$87,799,486 for the third quarter is the smallest for all quarters back to the third quarter of 1920 and a reduction of fully 15 per cent from the \$102,351,371 of the third quarter of 1925.

RAILWAY EQUIPMENT ORDERS Recent equipment orders reported by Railway Age include three Pacific type locomotives for the Manila Railroad given to Baldwin Locomotive works. The Chicago & Northwestern has booked 500 stock car bodies with Illinois Car & Manufacturing Company, which also has received an order for 100 poultry cars from the Palace Poultry Car Company. The Missouri-Kansas-Texas plans to build 500 freight cars in its own shops.

owned by Electric Alloy Steel Company.
The plant was purchased for \$125,000
and \$1,000,000 was expended on it by
the former owner. Capital structure of
the new company consists of \$150,000 of
6 per cent bonds. \$150,000 of 7 per cent
preferred and 5000 shares of no-par commod stock.

HIGHER UNION OIL EARNINGS HIGHER UNION OIL EARNINGS
Union Oil of California net profit of
\$9,750,000 after interest, depreciation, depletion, federal taxes, etc., for nine
months ended Sept. 30 is equal to \$2.57 a
share (par \$25) on \$94,553,450 stock, compared with \$8,750,000, or \$2.31 a share in
the same nine months of 1925. Net
profit for September quarter was \$3,
550,000 equal to 93 cents a share, compared with \$3,500,000, or 92 cents a share,
in the preceding quarter and \$2.850,000,
or 75 cents a share in the September
quarter of 1925.

COPPER INQUIRY BETTER NEW YORK, Oct. 12—Copper inquiry is somewhat better in the domestic market, with the price at 14½ cents delivered to the end of January. Foreign buying remains quiet, with the price 14.25 @14.30 cents c. i. f. Hamburg, Havre and London.

ATCHISON'S LOADINGS INCREASE Atchison handled 43,765 revenue freight cars in the week ended Oct. 8 compared with 42,140 in the similar

ADAMS EXPRESS

INCOME LARGE

Could Easily Pay Higher Dividend, but No Change

> Is Anticipated With Adams Express Company committed to a regular dividend policy since segregation of its operating ex-press business, it would be a de-parture at present to increase the 6 per cent rate or distribute any treas-

tween 15,000 and 16,000 cars, and a correspondingly high rate of output is in prospect practically up to the close of the company's fiscal year on Nov. 30.

The following table shows quarterly earnings for the last two years:

Quarter to Net *A Sh Net A Sh Not A Sh Nov. 30.

Quarter to Net *A Sh Net A Sh Nov. 30.

\$5,122,805 \$1.83
Aug. 31. \$4,643,658 \$1.70 \$3,840,268 \$1.31
May 31. \$6,010,824 \$2.20 \$4,193,350 \$1.41

panies.
It conducts no business except re can Railway Express Company tool over Adams express business in June, 1918, under the supervision of the Director-General of Railroads. Adams operating expenses since have consisted principally of executive administration costs of about \$65,000 annu-

Higher Rate Conservative Higher Rate Conservative

With earnings of a non-operating company averaging \$9.50 a year, an increase to a 7 per cent basis could be conservatively made. There is every prospect that even an 8 per cent rate could be safely maintained. Income from collateral pledged more than paid interest charges on the two collateral trust issues last year, leaving \$1,061,000 in interest and dividends from other securities owned available for the \$66,000 executive expenses and for the common, tiv expenses and for the common or \$9.96 a share. Dividends on \$11,-904,300 American Railway Exp stock held by Adams amounted to 714,258 alone, equal to \$7.14 a share on Adams stock and more than paying

the Adams dividend.

Besides ability easily to cover an increased dividend, Adams has realized a sharp improvement in treasury position. It had converted a \$2,126,000 position. It had converted a \$2,120,000 profit and loss deficit at the close of 1920 into a \$6,608,000 surplus at the close of last year, largely through appreciation of securities held but also through profitable liquidation of

High Book Value Speaking of recent German proposals for issuing securities for sale in the American market, Mr. Hobein said: "German bankers are overestimating the market in the United States for German securities. They are now stating that the next German loan will be issued payable in marks. "Perhaps the basis of the estimate of the American market is the easy money conditions in Germany most of the year, conditions perhaps due to tather, extraordinary circumstances. Germany apparently has surmounted to the summarket value of \$4,413,437, collateral pledged under 4s of 1947 had a market value of \$4,413,437, collateral pledged under 4s of 1948.

collateral pledged under 4s of 1948 \$6,190,828, and miscellaneous securities

\$5,284,170.

The company has published no statement of outside security holdings since Dec. 31, 1923, which list contained no securities which could have

LIBERAL SCANS PARTY'S COURSE

Sir Ernest Benn Criticizes Political Proposals He Calls Vicious

Special from Monitor Bureau LONDON The troubles of the Liberal Party, which great numbers which evolves the conscientious obof sincere people in England believe to be the only party through which constructive and sound progress can be expected, is a source of concern to all who hope for better times in mind. Peace involves the ability to see some good in the other fellow, antagonism which exists between and the Liberal is the only political the group led by Mr. Lloyd George and the group led by Lord Oxford is painful- to all who believe that a stalemate exists between the Conservative or Tory Party and the Receivers

Sir Ernest Benn, the publisher, is a iberal who, while never active in olitics, is a typical representative of politics, is a typical representative of the business elements which look to ministration of necessary government; while the third pound is spent in pursuance of the notion that man liamentary groups. The present condition and management of the Liberal Party is, naturally, distasteful and My case is that the money so spent en who have built up their own harm. businesses by slow, sound operations, and who believe that the same soundness is necessary for the successful conduct of the Nation's business.

Sir Ernest has now addressed a ommunication to the editor of The Times in which he points out the necessary course to be followed, in his judgment, if the Liberals are to resuscitate themselves as an active political force. He says, in part: "I ntertain the belief that if the world were governed aright it might be a very happy and very prosperous place, and I accept the responsibility which attaches to British politics as the working model for the politics of the world. In my view the husiness of government is to provide a condi-tion of things in which the individual can function to the best advantage. But I accept as true Burke's dictum that 'To provide for us in our neces-sities is not in the power of government. It would be a vain presump-tion in statesmen to think they can

do it. The people maintain them, and not they the people.

"I am an individualist, and I require just as little government as is necessary to rid society of proved abuses. On these lines I believe there is to be found wealth and comfort for all. So that, if I am a Liberal, and if I represent the true Liberal faith, Mr. Lloyd George, Prof. Ramsay Muir, E. D. Simon, and others of their kind must eventually give up that the supreme mission of Kiwanis was to develop to the maximum the Kiwanian spirit between the two prepaganda endeavored to cast sus-picion upon their neighbor nation.

The future peace and prosperity of the world lay in the hands of the their kind must eventually give up the manufacture and offer for sale of political shams designed to tempt an ignorant electorate with benefits

of the world lay in the hands of the English-speaking geople, stated the Past District Governor, Blake Haladay. He believed that Kiwanis had a mission to perform in interpreting to the United States not only what Canada stood for, but what the British Empire stood for, which was one and the same. He thought that there was a Serious minunderstanding of Sir Ernest then cites a number of political propposals he cousiders victous, most of which have been put forward and exploded since the beginning of the present century. He now proposes a return to those ideas on which the Liberal Rarty first established itself and gaye its lead to the modernization of Britain, both mosterially and in its political was a serious misunderstanding of the British Empire among the people of the United States, and he sug-gested that one of the first things that should be done was to rectify the histories of the American Revo-

materially and in its political lutton. The American people should know that the Revolution was due to the action of a German King who happened to be on the throne of peace, economy and freedom of England, and not to the British trade. No other party can offer any people.

YALE ADOPTING FORWARD PASS

Elis Show Decided Change in Their Football Playing Style

NEW HAVEN, Conn. (Special Correspondence)—With the game with Dartmouth College on Saturday just in the offling speculation is running rife on the campus as to the potential strength of the Yale University team. In this contest the Eli eleven will meet its first real test of the season, having defeated Boston University by the large score of 51 to 0 and University of Georgia by the count of 19 to 0. Georgia by the count of 19 to 0. he stanchest supporters of the Blue e somewhat skeptical as to the pos-bilities of vanquishing the unbeaten Hanover team, and an aggregation sing in many respects the power

of the great 1925 team.

The real strength of the Yale team
is unknown. Its two early-season performances have indicated flashes of
power, but no sustained drives. Part of this undoubtedly is due to the great or this undoubtedly is due to the great quantity of new and unexperienced material on the team and part to the earliness of the season. That the New Haven men will use the aerial game to an extent never before employed in the annals of Yale football history is a annals of Yale lootball history is a foregone conclusion. In the two games played passes have been abundantly used and almost entirely relied upon for advancing the ball; also these passes have scored most of the touch-

team has shown only mediocre ability on the offense. The reason for the overwhelming use of the forward is being discussed here. Many believe it is a conversion of Yale to the modern game and others believe it is being used as a spectacular attempt to win games with only fair material.

Strong on the Defense

On the defense there have been many

On the defense there have been many neouraging signs. The linemen have requently charged through the opposforward walls to throw the carriers of the ball for substantial losses. The secondary defense has indicated prowess in breaking up the forward pass. At the present writing, the defense appears more formidable than

bears only a faint semblance are being held down by candidates who were not regulars last fall. In the wing positions are found D. B. Fishwick '28 and S. P. Scott '28 as the leading contenders. The former has been converted from a quarterback big, and is an excellent receiver of the forward pass. Scott at the othe end is a strong man in the line as well the receiving end of passes. The obstitute material numbers F. B. Dilins '27, a fast developing end; J. S. Coleman '27 and B. L. Mallory

The tackle places have been filled The tackle places have been filled most consistently by Guy Richards '27 and W. B. Vandergrift '27. Richards has been a regular for two seasons and bids fair to extend his record over another. The former Phillips Exeter Academy star looks faster down the field under punts than ever before. Vandergrift on the other side of the line was a substitute last side of the line was a substitute last side of the line was a substitute last year and appears to have the call; but it would not be at all surprising to see him replaced ere the campaign is over by Burt Benton '27B or possibly W. A. Webster '28S, captain of his freshman team, the most likely candidate for a guard, who may be transformed into a tackle should the foregoing candidates show signs of weakening. The guard material is

nirants as Sturbahn, Although out at the present time, W. A. Webster seems the most probable selection. Webster played very little and may be kept out again. If Webster is unable to play, R. W. Worthan '28S will no doubt be a regular. He made his letter last year and should prove a capable performer. J. D. Charlesworth '29, a regular on his freshman eleven, and J. D. Flaherth' '8 will prove formidable. J. P. Flaherty '28 will prove formidable

J. P. Flaherty '28 will prove formidable reserve guards and the former may even gain a regular position should he develop as much in the next few games as he has in the past two.

For the center assignment, C. B. Harvey '28, a 175-pounder, is out in front. Harvey is an accurate passer, although comparatively inexperienced. A rugged contender is found in G. V. Phillips '29, a regular on his freshman team. Outside of these two men, there are few promising candidates for there are few promising candidates for

the pivot position.

As has been the case in the past, backfield material is plentiful. For every position there are several strong contenders, thus enabling the coaching staff to make frequent substitutions in important factor in the present-day style of play, which demands an array of reserve material.

Bunnell Natural Leader Capt. P. W. Bunnell '27, the diminu-tive 157-pound quarterback, will be back again in his old rôle of snap-

back. In addition to being a brilliant broken-field runner on running back punts and an excellent field general, Capt. Bunnell is a natural leader. He possesses the ability of general, Capt. Bunnell is a natural leader. He possesses the ability of maintaining the proper morale and unity in the squad ranks, and above all has the complete confidence of every player. A reliable understudy for Bun-nell is E. L. Decker '29, who has acquitted himself well in the early rames. Another competitor is P. F. mes. Another competitor is P. F

The leading backs include Bruce Caldwell '28, W. S. Kline '27S, A. S. Foote '28, J. J. Wadsworth '27 and L. M. Noble '27. Thus far Caldwell has shown himself to be the star of the lot, being a wonderful line-plunger on off-tackle plays a good number and an M. Noble '27. Thus far Caldwell has shown himself to be the star of the lot, being a wonderful line-plunger on off-tackle plays, a good punter and an accurate forward passer. He will be counted to carry on the brunt of the attack. Kline is playing his third year as a regular. He is considered one of the best men in the backfield interference. On awet field, Kline is a valuable ground gainer.

Noble is a fighter and just the type of player to be injected into the fray.

able ground gainer.

Noble is a fighter and just the type of player to be injected into the fray, when both ground and more pep are needed. A strong defense man is Foote,

when both ground and more pep are needed. A strong defense man is Foote, and Wadsworth's specialty is placement kicking. Other backs not so well known are J. A. Brandenburg '28, captain of his freshman team; E. A. Goodwine '28, a member of his freshman eleven and a fleet runner; K. D. Stone '28, a last year's substitute, and J. A. Ordway '29.

During the first week of college Ordway was declared inellyble due to acholastic reasons, but it seems that he was incorrectly placed on disqualification because of a mix-up in the transfer of his marks. Ordway's return to the squad is of the greatest importance as he is considered one of the most promising of the backfield men. He was one of the leading prep school piayers in the East while he attended Berkshire Academy and was a star on his freshman aggregation.

Coach T. A. D. Jones '988 is again head coach. The only new member of the staff is Maj. W. E. Pritchard, who is stationed here with the Yale R. O. T. C. He is in charge of the backfield. While at the United States

Borg Smashes Three More Aquatic Marks

By the Associated Press Stockholm, Sweden, Oct. 12 RNE BORG, the Swedish A champion swimmer, has set up new swimming records at three distances. He covered the 500 yards in 5m. 35½s.; 300 yards in 3m. 15.7s., and 300 meters in 3m. 331/28.

The previous records were made by John Weissmuller, the American star-5m. 47 3-5s.; 3m. 16 3-5s., and 3m. 35 1-5s. respectively.

Military Academy Major Pritchard was a star quarterback. In some circles the forward passing game used by the Elis now is being attributed to the former Military Academy player. The other members of the staff are E. T. Blair '24, C. A. Comerford '18, Myron Fuller '118, W. M. Lovejoy '25, and M. A. Stevens '25, who is in charge of the scrubs.

Beside playing Dartmouth on Saturday, Brown University, United States Military Academy, University of Maryland, Princeton University and Harvard University are to be encountered.

JUST how good a team Yale has will be shown Saturday

ply tested.

Harvard's stocky fullback, A. H.
Miller' 27, is out of action for a few
days as a result of his strenuous activities last Saturday against Holy Cross,
but he is expected to be ready to play
against William and Mary College. Capt.
C. D. Coady '27 and Leo F. Daly '27
were on the field yesterday, but not in
an actual workout and may be able to
play after the game Saturday.

Coach W. W. Power is sending his Coach W. W. Roper is sending his Princeton University football men through secret practice. This secrecy is not because of doubting Yale's honesty

in the non-scouting agreement, but it has other teams which are formidable on the schedule to keep its plans from.

Grounds. The Ohioans have shown up well to date and, contrary to the majority of the college team offenses, the visitors are not bringing a reputed ariel attack. So far this season Ohio has relied on rushing the ball, and with a remarkably fast-charging line it has met with much success. Large scores have been made by each team Ohio scoring a total. 87 to 14, in two games, while Columbia has totaled \$1 to 0 in three games.

Incidentally the Ohio alumni of New

three games.

Incidentally the Ohio alumni of New York are financing the bringing of the famed Ohio band of 100 pieces and 35 in the fife and drum corps, which will add color to the Polo Grounds scene before and during the game.

COLUMBIA HAS FIVE MEETS weakening. The guard material is more abundant and will enable such a change, should the occasion demand it. S. S. Quarrier '28, member of the varsity crew, is also a possibility.

One guard position is clinched by H. C. Sturhahn '27, the accepted choice on most mythical elevens a year ago. The other guard will be more difficult to fill, there being no such outstanding aspirants as Sturhahn. Although out

SPORTSMANSHIP PREVAILS IN SERIES VICTORY OF CARDINALS

Fielding and Hitting Performances Are Numerous, but Biggest Impression Is Made by Expression of Good Will and Fair Play

Although World Series records fell in many instances in the big classic of 1926 which ended Sunday in a victory for the St. Louis National League champions over their American All fielding records stood the test of

courageous, sportsmanlike attitude the Cardinals took when they pitched to Ruth in the last inning of the last game, as well as on many other oc-casions, really stand out over and above the individual work of any

The victory of the Cardinals is The victory of the Cardinals is a popular one. Unquestionably 99 per cent of the baseball fans were cheering for the Cardinals to win. They deserved it. They fought an up-hill struggle after the first five games, which will long be remembered. And today, they stand the champions of the world in baseball for 1926, the tenth National League team to win the title of world champions since the the title of world champions since the first official World Series between National nd American League team

National League Clubs Gaining

Since 1920, the National League clubs have been slowly but sured creeping up on the American Leaguer n world championship victories. The In world championship victories. The Cardinals' victory makes it the fourth in the last six years for the National clubs and gives them 10 out of the 22 played. It is interesting that the series just ended was the third straight that has gone the full seven games to a decision. The first of these three successive seasons was the first to go the full number of games necessary to a decision, since 1909, when Pittsburgh defeated Detroit, four out of seven played games.

seven played games.

The first record to be broken in the 1926 series was by Ruth. The first time seven played games.

Evidently because the St. Louis Cardinals won the world's baseball title promoters are of the opinion that it needs professional football, and news reports state that efforts are being made to buy the popular Providence Steam Rollers. That Rhode Island team is a very good one, but when placed out in St. Louis with practically all eastern players the fans of that city are not likely easily to familiarize themselves with strangers, and it is doubtful if the New Englanders would acclimate themselves to playing their customary game out there.

Columbia University lost to Ohic State University, 9 to 0, last year and they meet argin Saturday at the Polo was a proposed to be broken in the 1926 series was by Ruth. The first time 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the 1926 series was by Ruth. The first record to be broken in the justice with the field in the opening of the first live field in the opening of the first live field i game out there.

Columbia University lost to Ohic State
Club ties a record. Ruth's total of
University, 9 to 0, last year and they
meet again Saturday at the Polo
Grounds. The Ohioans have shown up
Grounds. The Ohioans have shown up
to date and, contrary to the maharris of Washington last year. Ruth's
hatting average for the series, howbatting average for the series, how-ever, was only .300. Ruth's four bases on balls in the last game also tled a on balls in the last world Series' record.

The Cardinals had four regulars who The Cardinals had four regulars who hit over 300 and the Yankees had four hitting 300 or over. The highest average of the series, that of .417, was attained by Thevenow, less than a .300-hitter in the regular league season, but considered one of the best of hitters in the pinch. Combs. Yankee centerfielder, had the next best batting average of .357. The Cardinals scored 31 runs to the Yankees 21 and made 31 runs to the Yankees 21 and made 65 hits to their opponents' 54.

Ruth's Runs Total 18 Ruth brought his total of runs for Ruth brought his total of runs for total World Series up to 18, just two short of the series' record held by E. T. Collins of the Chicago White Sox. In home runs the series failed to come up to expectations. Fans had expected that with Meusel, Ruth, Gehrig and Lazerri in the same series with Hornsby and Southworth, home run records would be raised considerably, but Ruth was the only player on the Vankee would be raised considerably, but Ruth was the only player on the Yankee team to hit home runs and his four was certainly more than his part. Four were made by the Cardinals,—a total of eight for the series. The record is 12. The hitting duel expected between Hornsby and Ruth failed to materialize. Neither had high hitting averages, although Ruth's .300 was considerably better than Hornsby's .250.

considerably better than Hornsby's .250.

Pennock's pitching record of four victories in World Series without at defeat is nearly up to the record set by John W. Coombs of the Brooklyn Nationals and Philadelphia Athletics of five victories and no defeats in World Series games. Had Pennock won the last game be pitched in the won the last game he pitched in: that is, had the Yankees scored enough runs to overcome the Cardinals' one-run lead while Pennock was in the box during the last few innings, Fennock

tory for the St. Louis National League champions over their American League rivals, the New York Yankees, fans will almost unanimously concede that not records, not hitting, not pitching or fielding, but good, genuine sportsmanship on the part of the spectators and teams, was the most impressive part of the series.

Ordinarily, Ruth's three home runs in one game, Alexander's pitching, or Thevenow's hitting and fielding, were credited to it and one to Meusel in the outstanding features of the World Series; but the general expression of good will and commendation by home fans toward the visiting clubs and the courageous, sportsmanlike attitude

chances with only two errors. Lester Bell at third, made two and Alexander, pitcher, made one.

Alexander's two victories give him a World Series' record of three victories and one defeat. He won one and lost one in 1915 while pitching for the Philadelphia Nationals against the Boston Red Sox. His total of 17 strike-outs in the series nearly equialed the outs in the series nearly equaled the record of 21 made by Joseph Wood of the Boston Red Sox in 1912. Alex-ander's 1926 series' record is made more impressive when one considers that to the hard-hitting Yankees, he that to the hard-hitting rankees, he conceded only four bases on balls in 20 1-3 innings. However, bases on balls enabled the Yankees to do more scoring than they should have, for they were given a total of 31 bases on balls to the Cardinals' 11. Hoyt espe-

Columbia and Ford Again in Close Race

Former Won the First by Little More Than a Minute Over 40-Mile Course

GLOUCESTER, Mass., Oct. 12 (P)-GLOUCESTER, Mass., Oct. 12 (49)—
The Henry Ford shot over the line with a half-minute lead on the Columbia in the start today of the second contest for the fishing schooner championship of Gloucester. The official times were: Ford 10:00:48: Columbia 10:01:10. As they approached the starting line they found a north-west wind blowing 18 miles an hour. west wind blowing 18 miles an hour, with smooth seas and skies without a cloud.

would sail course I, the first five miles to stake boat off Rockport; the second, 10 miles, off to sea; the third leg, also 10, heading back toward Marblehead; the fourth leg, 10 miles, back to the Rockport mark, and the final five miles to the finish live miles

to the finish line.

This would make the first leg a close reach, and the second broad, the third leg would be the weather one, with the fourth a close reach and the final leg another weather one

Wind a Bit Light

The wind was a bit light for vessel of the size and power of these racers and everyone hoped that it would pick up with the flood tide. Every sail was bent. Both vessels took the starboard tack up the shore, with the Columbia

tack up the shore, with the Columbia leading. Then the Ford tacked about, went down by the reefs of Norman's Woe to the leeward and shot across the starting line.

Captain Morrissey kept his lead in the five-mile close reach to the first mark where the official time was Ford 10:27:77, Columbia 10:28:31.

Captain Pine, whose fine seamanship won the first race vesterday, held

Sent. Belly varied and the service of the proof toxical closely. Sent and the proof toxical closely. S

determine the logical contender for international honors.

This ancient fishing city wondering for three years whether the Columbia or the Henry Ford was the fleetest vessel of the Banks fleet still was undecided today. In a hard-fought contest yesterday the Columbia finished first by only Im. 4s. over a 40-mile course and credit for the victory went to Captain Pine's superior seamanship.

Races today and tomorrow were relied upon to settle definitely the question, whether the Ford or the Columbia ranked as the fastest of the fishing fleet. In a heavy blow yesterday the Columbia showed her heels to her opponent, but the Ford developed greater speed in lighter airs.

Express Mutual Respect

Captain Pine and Capt. Clayton E. Morrissey, skippers of the Columbia and Henry Ford, respectively, exexpressed mutual respect for their opponents and equal sportsmanship. Today it was rumored in Gloucester that Captain Pine, sportsman extraordinary of this fishing city, was sailing his last race. The skipper would not confirm it, but many of his friends said Pine would never again ta powerful line and it looks as though they would encounter another of the same caliber at Manhattan.

Strength shown by Grinnell in winnied to ver Iowa State. Coach M. J. Hydron in the same caliber at Manhattan.

Strength shown by Grinnell in winnied to ver Iowa State. Coach M. J. Hydron in the ver Iowa State was yielding to Oklahoma Agiest, but the followers by trimming the strong Marquette (Iniversity team at Milwaukee, 17 to 2, last Saturday, while Iowa Fate was yielding to Oklahoma Agiest, 3 to 9. Putting all it had into the first half, Grinnell, thrust through the line, swept the ends and passed for the fishing fleet. In a heavy blow yesterday the Columbia and Henry Ford developed greater speed in lighter airs.

Express Mutual Respect

Captain Pine and Capt. Clayton E. Morrissey, skippers of the Columbia and Henry Ford, respectively, exercity of the fishing fleet. In a heavy blow yesterday the course of the fishing fleet. In a heavy blow yes

the sort of thing they were saying in Gloucester today.

In the race yesterday it was a battle of skippers and it was Captain Pine's day. But the result was in doubt to the minute the leader crossed the finish line. There was no doubt whatever that in the contest of wits, Pine outfoxed Clayton and that is how Gloucester men expressed it.

The race was won in the lasts ix miles, after the vessels had contested four legs of the course with varying advantage, but on fairly even terms. On a 10-mile windward reach both skippers overstood the mark. Pine, well to leeward and shead, tacked to port and crossed the bow of the Ford. He found he could not fetch the mark, tacked back in front of Morrissey, blanketing him completely, and then in his own good time, filled and was off on the port tack once more, straight for the stakeboat and on a straight course for the short five-mile reach home. The Ford could not cut down the lead.

Master at Luffing

Master at Luffing That time Pine was master in the luffing game, but earlier in the day, he had come off second best in a similar brush. Rounding the second mark, well ahead of the Ford, Pine elected to hold well to windward off the course instead of setting for the third stakeboat. Morrissey accepted the challenge and the schooners stood away together and when the Ford was the first to turn for the mark, the Columbia fell far behind. when the Ford was the first to turn for the mark, the Columbia fell far behind. In that leg the Columbia lost its early lead of 38 seconds and its rival rounded the third flag a minute and one-half ahead. Then came the second matching of skippers' wits and this time Pine was not fooled.

Conditions were perfect for the start, off Eastern Point, with a northwest breeze of 20 to 24 miles, roughing up the bay. Captain Morrissey's to turn professional in preference to remaining among the Simon-pures

was not fooled.

Conditions were perfect for the start, off Eastern Point, with a northwest breeze of 20 to 24 miles, roughing up the bay. Captain Morrissey's caution at the start gave Pine the advantage. The Ford was bearing down toward the line, well ahead, but Morrissey, unwilling to beat the starting gun, sheered off and lost way. The Columbia was over two seconds ahead and Pine shot linto the weather lane, forcing the Ford to "eat his wind."

With the spanking breeze the Columbia beat the record of 34 seconds on that five-mile broad reach and on the 10-mile second leg, a reach close hauled, Pine added another six second to this advantage. Then came

close hauled, Pine added another six second to this advantage. Then came the luffling match, disastrous for Pine, and his recovery of the lead by expert sail handling on the fourth leg. Old Banks flishermen, who watched the working of the Columbia marvelled at the generalship of the skippers.

The wind veered about, during the race, and dropped at times to seven or eight knots. The heavy breeze seemed to favor the Columbia, while the Ford made faster footing in light airs. But in the main, they appeared perfectly matched and seamanship decided the issue. The course was patrolled by issue. The course was patrolled by United States Coast Guard vessels, and Lieut. Commander Stephen S. Yeandle of the coast guard directed operations from the destroyer Wainwright, which was used as the committee boat. The

FAMOUS TRIO TO

Nurmi, Wide, and Peltzer to Meet in a Series of Races This Winter

NEW YORK, Oct. 12 (P)-Negotis the United States this winter Paavo Nurmi, the famous Finnish runner, and his two foremost rivals, Dr. Otto Peltzer of Germany and Edvin Wide, the Swedish schoolmaster, for a series

of indoor meets.

The three overseas stars, according to reliable information reaching the Associated Press, will appear in a country-wide tour that promises to stir up the most spectacular indoor track competition the United States has ever seen.

It will be a return invasion for Nurmi, who swept nearly all before

Nurmi, who swept nearly all before him on a conquering tour of America in the winter of 1924-25; but this time he will have as opponents two men who not only have given him his clos-set races, but also have beaten him

to turn professional in preference to remaining among the Simon-pures and competing in the 1928 Olympic games. Dr. Peltzer, the German star who broke J. E. Meredith's half-mile record several months ago and later defeated Nurmi at the Finn's favorite distance, 1500 meters, in world's-record time, is understood to have refused an offer of \$25,000 to turn professional.

fused an offer of \$25,000 to turn professional.

Nurmi, Wide and Peitzer met a month ago in Berlin in two special races in each of which the Finn was outrun. Besides losing to Peitzer and Wide at 1500 meters. Nurmi also dipped his colors to Wide over a two-mile route which the Swede covered in record-breaking time.

All three runners are expected to arrive in the United States in November to train for indoor competition which probably will start early in January at Madison Square Garden.

MARSTERS ELECTED HANOVER, N. H., Oct. 12—Alton K Marsters of Arlington, Mass., was elected captain of the Dartmouth College fresh man football team here yeaterday. Marsters is left halfback on the eleven amprepared at Phillips Exeter Academy He also plays baseball and was a mem-ber of the track team.

eletic Association, was us it; Paul E. Callanan, Har ice-president; Robert C. E Center Squash Tennis (or, and Walter I. Badger, U

third competitor in 1925, will again enter a team.

The tournament for the Middlesex Bowl will be held Dec. 18 at the Newton Center S. T. C. Courts; the state championship will take place at the Harvard Club, beginning Jan 31. The Harvard Club, beginning Jan 31. The Harvard Club has also been awarded the Class B championship which will begin Feb. 14 and the Class C championship goes to the University Club and is to begin Feb. 28.

As a result of the admission of the new clubs to the association there will be a larger number of teams competing in the Class A, Class B and Class C infer-club championships this winter. There will be six teams in the Class A competition, Boston A. A., Harvard Club, Harvard University, Union Boat Cluh, Newton Center S. T. C., and Cambridge Squash Club being the contestants.

Ten clubs will take part in the Class B tournament. They will be Boston A. A., Milton Club, Newton Center S. T. C., Union B. C., Cambridge S. C., Harvard Club, Harvard University, Tennis & Racquet Club, Weston S. R. Club and University Club.

There will be at least 14 clubs in

the Class C championship and pos-sibly 16 depending on whether Massa-chusetts Institute of Technology and Neighborhood Club of Quincy enter the lists. The 14 which are sure to compete are Boston A. A., Harvard freshmen, Lincoln's Inn. Newton Center S. T. C., Tennis and Racquet Club, Walkover Club, University Club, Harvard Club, Harvard University, Milton Club, Newton Club, Union B. C., Weston S. R. C., and Chestnut Hill Club.

when the British team will play in Boston, it is expected that it will be some time in February. The national championship will take place at Detroit this year and will be played Washington's Birthday. Several new teams are expected to compete in the championship in addition to the

be considered as such without the binder.

The following game, contested at the recent Chicago tourney, interesting because it followed the same lines in the Ruy Lopez that Marshall played and lost to Capablanca in 1918, has been noted in a contradictory manner:

OTTAWA

Charles Ogility San OTTAWA

From the viewpoint of most advertisers evening newspaper circulation is of more value than morning circulation. Hence, each new name added to the subscription list of The Ottawa Svening Ciffisen enhances the value of the good-will and assets of the publishing company. No auch value diluches to subscriptions for The Morning Citizen. Therefore, the pub-lishers councilly invite those readers of The Christian Science Monitor who wish to have an Oltsube appear delivered to their homes to subscribe for The Evening Citizen. EDITORIALS

Investors in the United States are apparently becoming more and more interested in the

American Investors and Foreign Loans

semiofficial approval of the foreign loans that are placed in that Nation's investment market. In recent Washington dispatches it was declared that the proposed issue of \$300,000,-000 of German railway

bonds would not be approved by the Administration until France has ratified the Mellon-Berenger agreement on the war debt to the

While it is probably true that the American Government is not actually exercising any visé on the loans which foreigners place in the American market through private bankers, there is undoubtedly a powerful moral suasion exercised and it is doubtful whether any such loan as that contemplated for the German railways could be placed if the transaction had the direct disapproval of the United States Treasury Department. In the present instance, it was declared not to be a question of the marketability of the bonds, but, inasmuch as the issue would place the railways in a position to earn more reparations for France, it is felt that the United States should profit from it to a

That report came almost immediately upon the heels of a forum discussion in New York when a well-known economist proposed that foreign loans sold in the United States should be arranged in accordance with definite regulations defined by the State Department. This, in substance, is what is now being done apparently in the case of the proposed German railway loan. It is a scheme, however, which would greatly hamper the investment market if carried to any great extent, as of necessity the competition among investment bankers for the underwriting of such loans is keen and requires some degree of secrecy. If all proposed loans had to be submitted to Washington, it would curtail their volume, whereas on the other hand it might be a comparatively easy matter to prevent such loans as Washington disapproves from being floated without at the same time requiring Washington's definite approval of all loans floated.

The scheme suggested is not entirely dissimilar to that which was proposed back in 1917 and earlier, and actually put into practice in the case of the loans to the Allies during the World War. The proposition then advanced was that the credit of the United States should be loaned to friendly foreign powers. It was put into practice in the various war loans, the proceeds of which were used to grant credits to the allied powers in Europe. But obviously it would be impossible to grant any such privilege in normal times or in private cases, and if foreign loans floated by private bankers are to be subjected to any rule or supervision by the State Department, then it might as well be said that the loans are being approved by the Government and therefore should be guaranteed by the Government.

The very fact that foreign loans placed in the investment market of the United States are totaling such tremendous figures is no reason why the question of approval or guarantee should be passed upon by the Government. That would be asking quite a good deal of Washington and much more than even the investing public has a right to request. At the same time no honest investor would desire to lend his money in any quarter which might be construed as against the best interests of his country, and if Washington desires to exercise a visé upon projected loans it has the power to do so under the right of eminent domain. But even in exercising that right the Washington authorities should be careful not to overstep the proprieties or they might be drawing the Government into doing just that which would be detrimental to an open and free investment

The proposal of Auguste Gauvain, foreign editor of the Journal des Débats, that the ques-

Responsibility for the War and History's Verdict

tion of war guilt be determined by an impartial tribunal is not likely to meet with much favor. There is no gainsaying the fact, of course, that the much discussed Article 231 of

the Treaty of Versailles makes an altogether too extreme statement on this subject.

For the first time in history, the victor, in drafting the treaty of peace, made the vanquished admit causing the war, and the language of the Treaty of Versailles, which introduces, and is in part a moral justification for, the reparation clauses, is rather broad: "Germany accepts the responsibility of Germany and her allies for causing all the loss and damage to which the allied and associated governments and their nationals have been subjected as a consequence of the war imposed upon them by the aggression of Germany and

her allies." But what can be done about it, apart from simply wiping the article out of the treaty? Who would be sufficiently impartial to sit on an international tribunal to determine war guilt? How would it be possible for the decision of such a tribunal to satisfy everyone? How could such terms as "aggression" and "imposed upon them" be so defined that the decision of a tribunal would be intelligible and convincing? The historians who have examined the fearfully voluminous documents are in disagreement. All students who are familiar with the materials have more or less definite opinions. It would take months, even years, for an international jury, unacquainted with the facts, to inform itself sufficiently to hand down any verdict. The Reichstag investigating committees which inquired into such relatively restricted problems as Germany's prewar negotiations and attitude toward the peace overtures of 1916 had a well-nigh staggering task. Any jury would have to rely largely upon assistance from technicians, and the verdict of the

tribunal would therefore depend in large measure upon which professional historians were appealed to for aid.

It may have been doubtful policy for the Treaty of Versailles to embody such a definite statement of war guilt, but the question of who was primarily responsible for the outbreak of hostilities in 1914 will have to be left to the verdict of history. The historians will not agree. Their opinions change as new documents become available. Some historians now seem to be stating their cases in such fashion that their arguments are counter-propaganda against the propaganda of a few years ago that made Germany the sole culprit. Voltaire may have been too cynical when he defined history as a falsehood that is agreed upon ("une fable convenue"), but could an international tribunal revise Article 231 in accordance with what is really true?

Sometimes, it may be, the tendency is to impute to those expressing or displaying, upon

National Aggressiveness Without War

occasion, those qualities of patriotism which are inspired by achievement or by adherence to high ideals, that particular form of aggressiveness which, unless it is correctly analyzed and appraised, is classed as

militaristic. In the United States, in recent years, there has been apparent a growing determination on the part of some critics of national policies to regard with disfavor those who be-lieve that patriotism is, and should be, a proper and laudable quality of thought, and that the first and only allegiance of the citizen is to the country of his birth or adoption. That by thus declaring both fealty and admiration one irrevocably commits himself to the pursuit or defense of aggressive militarism has not been proved. True patriotism means much more than this.

If this statement of a more or less self-evident proposition is correct in its application to America, then surely it must be as generously applied to the people of every other country. It should not be insisted, this being the case, that some particular form of government must be established if the loyalty and patriotism of those chiefly concerned are to be applauded or condoned. Broadly speaking, but few people actually have any deciding voice in determining the exact form of the government under which they live. Even in America the institutions which are so greatly cherished and proudly defended are a heritage from those who had the vision and the courage to establish them in the face of almost overwhelming odds. In parts of Europe, it is true, significant changes in the form of government have recently taken place. These have come, largely if not entirely, as a result of the war. Without these attending circumstances, no doubt fortuitous, it is not likely that national initiative, unaided, could have been eloquent enough or powerful enough to change what had long existed as the established form.

Attention is insistently and persistently directed toward Italy, where, instead of a yielding in the direction of the somewhat popular trend toward democracy, as in Germany and other sections of central Europe, the movement has been, apparently, retrogressive and back-ward to absolutism. And yet there is no doubt that there, as in other countries, there exists and thrives that loyalty and patriotism to the prevailing form of government which is inherent in the nationals of every land. It may be that a better conception of true nationalism than they believe it possible for the people of a despotism to reflect, have been inclined to look askance at the dominant figure in this movement which has brought about Italy's transformation, its regeneration, its orderly rehabilitation from a condition little less than chaotic, and to await contemplatively the next move in what they have believed to be a carefully staged political and industrial drama of which they have witnessed little more than the prologue.

The people outside of Italy may still be awaiting the expected rise of the curtain on the first act of the story which many believe has already been written and dramatized. They have insisted that Italy's extreme nationalism must find expression in militarism, rather than alone in intensive industrialism. Is the popular idea an erroneous one which inseparably links patriotism with militarism? It would be strange indeed if one who has arrogated to himself all the powers of a dictator in national affairs should prove to be the one to correct what may, after all, he a common misconception. Signor Mussolini publicly disclaims any ambition to gain for Italy and her people anything that cannot be gained by peaceful methods and by those processes which prove the country and its citizens capable, first of all, of establishing and maintaining their own industrial and economic independence. No one should suppose for a moment that the undertaking, under existing circumstances, is an easy one. Lacking that patriotism and loyalty which are always commendable, the task would not be undertaken, and if entered upon half-heartedly would be doomed to failure.

Signor Mussolini has been directly quoted as saying, in answer to an inquiry regarding his own and Italy's future ambitions, that he and his people have enough to occupy their attention in developing their own country and its resources. "We have ample room," he said, "for all the labor we can command." He declared that all Italy's requirements, and even all her ambitions, can be fully satisfied by methods of peace. He insists that she is not a supplicant for favors, neither is she regardless of the rights of others. By indirect quotation he is made to say that all of Italy's policy is directed to peace, and that within the frame of her national development there is no room for war.

It is neither unreasonable nor unfair to say that what has already been accomplished under the Fascist rule in Italy has been accomplished as a result of the loyalty of the people of the country to Italy, not because of the existence of a dictatorship, but because of that inherent patriotism which is rarely, if ever, destroyed in the human breast. This loyalty has been capitalized, it is true, by a resort to processes which are not universally approved. Perhaps it could not otherwise have been as effectively marshaled and

While there is a natural bounty of resources beyond compare in the countries lying south of

Agricultural Research for South America

Panama, men of research looking further than the immediate present opine that the time has come when a more orderly utilization of these resources is demanded lest these countries lose their leadership

where they have been almost supreme. It should not be overlooked that Africa, Asia and the East Indies of late years have made great progress in the particular direction where South American products for export are concerned, and that competition is likely to become keener than it is today, rather than less so.

History teaches that the foundation of agricultural progress is research. Natural prodigality may answer for a while, but the time comes when more systematic methods become essential. It is this fact which is now impressing South Americans with a larger vision of the needs for the future. In the domain of rubber and of sugar, especially, it is believed necessary to establish laboratories in greater number, and to study plant development more intently. Primitive methods must give way to modern. The most progressive countries elsewhere have taken action to establish special experiment stations for their tropical crop industries.

Of tropical plant products that the United States buys from all countries to the value of \$1,500,000,000 each year, South America furnishes \$356,000,000 worth. It is apparent, therefore, that the southern countries can increase their exports greatly with improved methods for production and distribution.

Now, it is essential to Pan-American homogeneity as regards interchange of trade that nothing be left undone to maintain a satisfactory balance, more particularly because the United States possesses in South America one of its best customers. There are to be found vast areas of unused land in a climate where plants grow the year around. The greatest contributions of food from the tropics will be sugar, vegetable oils and fruits, for which there are available very large areas of land now undeveloped. The more this country can buy from South America, the greater will be the sales of American products to South America.

South America should take a leaf from what the United States is doing in Hawaii. Hawaii believes in experiment stations. Hawaiian sugar planters maintain one of the finest experiment stations in the world at the annual expense of a quarter of a million dollars.

Can food supplies be drawn from the tropics to postpone to the distant future the time when production may fail to keep up with supply? The question can be answered only by intensive and highly efficient cultivation, and South America may well give heed to this. It would seem, therefore, that a period of wonderful development is assured to the countries in Latin America if the other countries of the world turn to them for these commodities which are so essential to modern civilization and for which no substitutes have been found in temperate zones. The wealth and prosperity of South America rest upon its agriculture-including, as it does, the products of farm, ranch and forest.

W. A. Orton, director of the Tropical Plant Research Foundation in Washington, points out that there is need in the case of each of the great tropical crop industries of a special survey to study the present conditions, to take an inventory of resources, point out and define the problems, and outline a program of research, with recommendations as to equipment and personnel.

Editorial Notes

Apples lie thick on the ground in the Michigan fruit belt, food for hogs. This is an annual story, there and elsewhere. This year's plentiful fruit crops and low prices at the point of production, however, do not necessarily mean that baked apples in city restaurants will get much lower than the usual fifteen cents each. The grades that bring fifty cents a bushel at the local fruit exchange or from the commission merchant are not the big apples suitable for baking. Fifty-cent apples would be a boon to many a city family fond of pies and apple sauce, but the cost is doubled when laid down at a market only 100 miles away, without taking into account wholesale and retail profits. The farmer often lets apples stay on the ground because picking and shipping costs exceed the market

The heyday of river traffic, when proverbially palatial packets carried gay crowds of men with purple trousers, ruffled shirt bosoms and beaver hats, and of ladies in "tilters," wearing halfhanders and odd little flat hats, may never return, but freight transportation on inland American streams shows a gratifying increase. Barge lines regularly carry steel and other manufactured products from Pittsburgh, St. Louis or the Twin Cities at the head of the Mississippi to southern markets or Gulf ports; coal from the Kanawha River district and elsewhere, grain from the Northwest and oil from the Louisiana and Arkansas fields. Major General Jadwin, Chief of Engineers, U. S. A., reports a 44.8 per cent increase in Ohio River commerce in a year. Water transportation is one way to help reduce ultimate costs.

National parks necessarily are areas which preserve the unique, the superb, the extraordinary in scenery and natural wonders. They are, consequently, few and far between. The state park movement, which has recently sprung up, encouraged by the national conference on state parks, eventually may become more than merely supplemental to the national park service. As the conference nears its goal of "a state park every 100 miles," these public playgrounds, dotting the tourist routes, should exert an influence for good in bringing thousands closer to a realization of the great natural beauties of America. Much that is beautiful, much that has recreational value, much that might otherwise be lost through the encroachments of industry, may be preserved to posterity through this movement in many states.

Publicity by Postmark

By SIR ALFRED ROBBINS

RINGLAND'S Postmaster-General is in a strait betwixt two—the trader and the taxpayer—over his proposal to allow private firms to advertise their wares through the medium of postmarks. Having accepted the advice of some unknown expert that he could add a little to the national revenue by this device he has aroused a degree of indignant protest that was far from foreseen.

Probably the contention that the proposed proceeding is undignified leaves this high ministerial official cold, for it is the pence and not the propriety he is expected by the Treasury to study. He may not even be moved by the obvious argument that it would be monstrous for an emporium to pay the Post Office to distribute a million circulars, and for that department to make a further profit by stamping on each one a puff of somebody-or-

Similarly, the feelings of a convinced advocate of temperance when receiving an exhortation to drink Scotch whisky, or Burton ale, or Dublin stout, would be difficult to put into parliamentary words. It is little wonder that, in advance, great commercial firms, naturally not appreciating the idea of their keenest competitor being given the chance to advertise on those firms' mail, declare the intention of sending out their literature in black envelopes, having only sufficient white space to allow for the stamp and the address, and none for extraneous advertisement.

+ + + Perhaps the most effective argument with the Postmaster-General will be that the countries which have experimented with the private advertising system by neans of postmarks have given it up. Germany is declared to have had a single try at it, and that was an effort to "boost" Dutch bulbs; but this was soon discontinued. Italy made a number of experiments in this direction in 1923 and 1924; but postmarks advertising private wares so offended the public sense that the postal authorities in 1925 stopped the practice; while it is averred that in Holland a governmental attempt to establish the idea was defeated by, an injunction in the high court.

There would in England be a double chance, one coming from each party to the controversy, to obtain a decision of the law courts on the subject. The Postmaster-General might try to enjoin a trader from sending out envelopes so colored as to defeat the Government's moneymaking designs. The trader might try to enjoin the Postmaster-General from defacing his envelopes by advertisements over which the payer for the postage had no control. It would be a pretty quarrel, which would bring grist to the lawyers' mill; but the game altogether seems scarcely worth the candle.

There are cynics who say that, even if the Postmaster-General persevered with his project, it would make little or no difference, because the English postmarks are notoriously the worst in the world in point of clearness and legibility; and, therefore, the addition of an advertise-ment could offend nobody, because it would convey

There is more than a grain of truth in this contention. as any who are in the habit of receiving correspondence from a number of countries can testify; but there can often be read, even without artificial aid, so simple a "slogan" as "Buy British Goods," or the more vaunting "British Goods Are Best." But in England there has been little attempt at any time at expansions, from that earliest

period when, in the stress of war, the people were enjoined to "Buy Treasury Bonds," or were later reminded that there existed a "British Empire Exhibition at Wembley."

been thought, had given the subject much attention. Yet it now appears that there are collectors of slogan and advertising postmarks, as there are of stamps, and shells, and sealing wax—and, one is tempted to add with Lewis Carroll, of cabbages and kings.

Such a collector of long standing, living in London, boasts the possession of about 20,000 cancellations of this kind, embracing specimens from almost every country in

boasts the possession of about 20,000 cancellations of this kind, embracing specimens from almost every country in the world. These would furnish an interesting exhibition; which the Postmaster-General would do well to attend.

A much more modest collection furnishes some interesting national divergencies. In the main, these slogans are devoted to concerns of state, some political, some social and some industrial, these last in a general sense. There is a stern practicality about that one adopted by the Irish Free State which thought to please patriotic pedants, and so printed the postmark in what is supposed to be Erse, giving the addendum in English, the language understood by the people, "Invest in Post Office Savings Bank."

A semisentimental touch is to be noted in the Canadian injunction, "Protect the Birds and Help the Crops"; but Australia gives a series of lessons in commerce and citizenship alike in "British Empire Exhibition, Always Ask for Australian Goods," "Post Early Each Day" and "Commonwealth Rolls. Remember Correct Enrolment Compulsory." "Support S. A. Industries" and "Buy South African-made Goods" are somewhat obvious at the Cape of Good Hope, as well as "Buy Union Loan Certificates"; but "Census Dag 4 di Mei" in the Transvaal is more distinctive. more distinctive.

more distinctive.

The elongated New Zealand formula, "Ask for and Buy New Zealand-made Goods" is harmless and searcely rousing. Much more vivacious and diversified are the postal slogans of France, ranging from the thrifty "Cheques Postaux, Demandez l'Ouverture d'un Compte Courant"; to the soaring "Utilisez la Poste Aerienne Se Renseigner Dans les Bureaux de Poste"; and the light-hearted "Visitez la Foire de Paris du 10 au 25 Mai."

When the frontier is accessed and Switzerland resched

When the frontier is crossed and Switzerland reached, there is the more precise and practical order, "Stadt-adresse Strasse Hause Nummer Augen"; but, while Norway furnishes a Nordic touch of taciturnity with "Stott Norsk Arbeid," Belgium has the breezy injunction—and in English, for the British and Americans are in these times the greatest patrons—"Visit Ostend the Queen of Seaside Resorts"; and Blankenberghe near by has a alogan

In the United States are presented a large variety, some covering the whole country, while others are of special state or city concern, though in some states no special state or city concern, though in some states no postal slogan of any kind, even a widely national one, seems to be postally imprinted. The "Buy Victory Bonds" of the war period, followed by "Learn While You Earn. Join U. S. Army," of the immediately succeeding years, have their successors in the jaunty "Let's Go! Citizens Military Training Camps," and the more serious "Red Cross Roll Call—Join," of today. "Address Your Mail to Street and Number" is to be found everywhere, like "Register or Insure Valuable Mail," but "Air Mail Saves Time." is more rare and "Mail Fasty at Christmes" is "Register or Insure Valuable Mail," but "Air Mail Baves Time" is more rare, and "Mail Early at Christmas" is purely seasonal, just as "Sésqui-Centennial Exposition, Phila, June 1—Dec. 1, 1926," is largely local as compared with widely national.

But when one studies them all—and Italian, Dutch, and the rest are worth it—the old legal question arises, "Cut bono?" To whom or to what cause does this extensively worked system bring good? It appears a regulated by

It would supply an informing as well as an interesting chapter in a systematic study of various nationalities if there were an analysis of the additions for publicity purposes made of late years to their postmarks. Before the present controversy broke out, no one, it might have

The World's Great Capitals: The Week in Rome

PROF. ALFONSO BARTOLI, who has succeeded discovery of the "Domus Augustana" would be the crown-forum, has now been for fully a year engaged in Latin poet Virgil. At present he is putting in order the Antiquarium Forense. which was founded by Boni, and which is destined to receive all pieces of sculpture, inscriptions, coins, etc., found in the Forum. This interesting little museum is placed at the corner of Santa Francesca Romana, under the watchful care of the director, who devotes much of his time to the work of classifying and arranging the fragments as they come to light. It may be thus seen that Professor Bartoli's program is not an ambitious one of excavations and discoveries, but rather one of reconstruction. The Temple of Saturn, rising underneath the Capitol, is almost hidden underneath scaffolding just now, for a big lump of marble dropped from the entablature recently, and the beautiful ruins are being restored and strengthened. This had already been suggested by the famous French architect Valadier more than a hundred years ago as "an urgent measure." To the right of the Temple of Saturn is the Basilica Aemilia, Excavations carried out here have not been very successful, the latest treasure-trove consisting in a pair of metal scales and a large number of coins, only one of which, however, is

4 4 4 As long ago as the year 1900 a number of marble fragments were found near the Fountain of Juturna, where legend had it that the Dioscuri stopped to water their horses after the battle of Lake Regillus. With great patience Professor Bartoli has put these fragments together again, with the aid of strong cement, and from a meaningless puzzle there has arisen a graceful circular fountain with ornaments representing leaves and flowers. The remains of the Temple of Vesta are also to be restored shortly, at a cost of 120,000 lire. They occupy the area where the Church of Santa Maria Liberatrice originally stood, and consist of fragments of columns, seven capitols, the stylobate, the architrave and numer ous marble fragments scattered around the circular temple, in which for ten centuries the sacred fire of Vesta was kept burning incessantly. On the Palatine two important works are in course of progress, the construction of the Palatine Antiquarium and the demolition of the Villa Mills. The Antiquarium, or museum, will be divided into two sections, the first, to be placed in the Casina Farnesina, where the great Giacomo Boni worked, including the bust of the eminent archæologist, his library, besides bronze and earthenware objects. In the second section, to be housed in a wing of the Casa Vespasiana, will be placed sculptures, inscriptions and mural paintings. The marble fragments consist in several mutilated statues, some fine sarcophagi, beautiful Bacchic masks and bas-reliefs found in the Orti Farnesiani, as well as an interesting well.

The Villa Mills, which was built by a Scotsman on the ruins of the Mattei villa, is now being demolished, not only because it is wholly out of keeping with the majestic surroundings, being built in a very early Victorian style and painted pink, but because it is hoped that it has a big surprise in store, no less a surprise than the discovery of the remains of the "Domus Augustana," or Palace of the Emperor Augustus. It is known, indeed, that when Augustus became Pontifex Maximus he should have taken up his residence, according to custom, near the Temple of Vesta. But he was loth to leave the Palatine, so he solved the difficulty by having an imitation of the Temple of Vesta built close to his palace, which was not far from the Temple of Apollo. Now if excavations which are going on will bring to light the remains of the sham Temple of Vesta and of the Temple of Apollo, little doubt can remain that the Villa Mills occupies the site of the

House of Augustus. Should this prove to be the case, the

The inhabitants of Forli, in the Province of Romagna, vishing to make a present to Benito Mussolini, who was born at Predappio, a small commune near Forli, offered him the castle of Rocca Caminata, which lies on the top of a hill and is one of the most beautiful medieval eas of the district. The Duce, at first, accepted with gratitude and pleasure the generous offer, and a sum was soon raised among the Fascists of the Province for the purpose of buying the castle and converting it into a museum, according to the desire of the Prime Minister. In this museum were to be exhibited the presents received by the Duce from all his admirers in all parts of the world. But all of a sudden Signor Mussolini declined the offer, and now an opposition paper unravels the mystery of the Premier's refusal, which does him no little credit. It evidently reached the ears of the Premier that the committee in charge of the restoration of the castle, having insufficient funds to proceed with the work, had, without the knowledge of the Duce, applied to the Ministry of Finance for financial aid. Signor Mussolini was distinctly annoyed at this, and in a few crisp words informed the committee that he refused their offer,

Rome is, perhaps, the only European capital which is not yet connected by air with any continental center. But with the rapid growth of the Italian commercial air service this deficiency is to be remedied, and Rome will very soon become the terminus of a very important air linking Italy with Germany and central Europe. An Italian company, the Aero Lloyd, has just been formed for this purpose and has submitted to the authorities a plan for a regular air service between Rome, Milan and Munich. The distance from Rome to Milan, over 300 miles, can be covered in about three and one-half hours, and that from Milan to Munich, which is about 190 miles, can be accomplished in something over two hours. The latter route will be over Lake Como and the Valtellina Valley to the Brenner Pass, and special airplanes of the quadruple engine type will be constructed capable of flying over the high Alpine Mountains, at an altitude of 13,000 feet. Rome will thus be connected to Munich, Berlin, Warsaw, Prague and Moscow, while the cities of central Europe will establish quicker communications with the Balkans and the Near East via Italy.

Letters to the Editor Brief communications are welcomed, but the editor must rem fudge of their suitability, and he does not undertake to hold his this newspaper responsible for the facts or ominions presented, mous letters are destroyed unread.

"Empires and Leagues"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: I am profoundly grateful for your recent editorial en-

titled "Empires and Leagues." I consider this editorial one of the most important of any I have read in the Monron, for therein is given a plan that can surely be adopted and that would end war, for it would be impossible to promote war if the United States and Great Britain would refuse to grant "aid and

This would require "no entangling alliance," but just a friendly and kindly understanding similar to the friendly relations that the United States has with Canada over thousands of miles of boundary without pointed gun.

What better way to promote peace and good will?

And what plan could be more simple and so sure?

Michigan City, Ind.
